Cisco Certified Network Professional CCNP is the intermediate level Cisco certification for network support. This is the next step for networking professionals who wish to validate their skills beyond the Cisco Certified Network Associate CCNA level or who wish to have a path to the expert level certification of CCIE. CCNP tests a candidate's skill in installing, configuring, operating, and troubleshooting complex routed LANs, routed WANs, switched LANs, and dial access services. Where CCNA requires candidates to pass a single exam, CCNP requires candidates to pass four written exams, including 640 901 BSCI, 640 604 Switching, 640 605 Remote Access, and 640 606 Support. The official exam self-study guides for each of these exams are now available in this value-priced bundle. These books, CCNP BSCI Exam Certification Guide, CCNP Switching Exam Certification Guide, CCNP Remote Access Exam Certification Guide, and CCNP Support Exam Certification Guide, present the certification candidate with comprehensive review and practice of all the key topics that appear on each of the CCNP exams. This new edition of the Cisco CCNP Certification Library replaces the previous edition. ISBN 1 58720 037 6
