Collective Intelligence Systems For Science And:

Handbook of Collective Intelligence Thomas W. Malone, Michael S. Bernstein, 2015-11-13 Experts describe the latest research in a rapidly growing multidisciplinary field the study of groups of individuals acting collectively in ways that seem intelligent Intelligence does not arise only in individual brains it also arises in groups of individuals This is collective intelligence groups of individuals acting collectively in ways that seem intelligent In recent years a new kind of collective intelligence has emerged interconnected groups of people and computers collectively doing intelligent things Today these groups are engaged in tasks that range from writing software to predicting the results of presidential elections This volume reports on the latest research in the study of collective intelligence laying out a shared set of research challenges from a variety of disciplinary and methodological perspectives Taken together these essays by leading researchers from such fields as computer science biology economics and psychology lay the foundation for a new multidisciplinary field Each essay describes the work on collective intelligence in a particular discipline for example economics and the study of markets biology and research on emergent behavior in ant colonies human computer interaction and artificial intelligence and cognitive psychology and the wisdom of crowds effect Other areas in social science covered include social psychology organizational theory law and communications Contributors Eytan Adar Ishani Aggarwal Yochai Benkler Michael S Bernstein Jeffrey P Bigham Jonathan Bragg Deborah M Gordon Benjamin Mako Hill Christopher H Lin Andrew W Lo Thomas W Malone Mausam Brent Miller Aaron Shaw Mark Steyvers Daniel S Weld Anita Williams Woolley Transactions on Computational Collective Intelligence XVIII Ngoc Thanh Nguyen, 2015-07-30 These transactions publish research in computer based methods of computational collective intelligence CCI and their applications in a wide range of fields such as the semantic Web social networks and multi agent systems TCCI strives to cover new methodological theoretical and practical aspects of CCI understood as the form of intelligence that emerges from the collaboration and competition of many individuals artificial and or natural The application of multiple computational intelligence technologies such as fuzzy systems evolutionary computation neural systems consensus theory etc aims to support human and other collective intelligence and to create new forms of CCI in natural and or artificial systems This eighteenth issue contains 9 carefully selected and revised contributions

Social Collective Intelligence Daniele Miorandi, Vincenzo Maltese, Michael Rovatsos, Anton Nijholt, James Stewart, 2014-09-17 The book focuses on Social Collective Intelligence a term used to denote a class of socio technical systems that combine in a coordinated way the strengths of humans machines and collectives in terms of competences knowledge and problem solving capabilities with the communication computing and storage capabilities of advanced ICT Social Collective Intelligence opens a number of challenges for researchers in both computer science and social sciences at the same time it provides an innovative approach to solve challenges in diverse application domains ranging from health to education and organization of work The book will provide a cohesive and holistic treatment of Social Collective Intelligence

including challenges emerging in various disciplines computer science sociology ethics and opportunities for innovating in various application areas By going through the book the reader will gauge insight and knowledge into the challenges and opportunities provided by this new exciting field of investigation Benefits for scientists will be in terms of accessing a comprehensive treatment of the open research challenges in a multidisciplinary perspective Benefits for practitioners and applied researchers will be in terms of access to novel approaches to tackle relevant problems in their field Benefits for policy makers and public bodies representatives will be in terms of understanding how technological advances can support them in supporting the progress of society and economy

Cultural-Historical Perspectives on Collective Intelligence Rolf K. Baltzersen, 2022-01-20 In the era of digital communication collective problem solving is increasingly important Large groups can now resolve issues together in completely different ways which has transformed the arts sciences business education technology and medicine Collective intelligence is something we share with animals and is different from machine learning and artificial intelligence To design and utilize human collective intelligence we must understand how its problem solving mechanisms work From democracy in ancient Athens through the invention of the printing press to COVID 19 this book analyzes how humans developed the ability to find solutions together This wide ranging thought provoking book is a game changer for those working strategically with collective problem solving within organizations and using a variety of innovative methods It sheds light on how humans work effectively alongside machines to confront challenges that are more urgent than what humanity has faced before This title is also available as Open Access on Cambridge Core [New Challenges in Computational Collective Intelligence](#) Radoslaw Katarzyniak, Adam Janiak, 2009-09-29 Collective intelligence has become one of major research issues studied by today's and future computer science Computational collective intelligence is understood as this form of group intellectual activity that emerges from collaboration and competition of many artificial individuals Robotics artificial intelligence artificial cognition and group working try to create efficient models for collective intelligence in which it emerges from sets of actions carried out by more or less intelligent individuals The major methodological theoretical and practical aspects underlying computational collective intelligence are group decision making collective action coordination collective competition and knowledge description transfer and integration Obviously the application of multiple computational technologies such as fuzzy systems evolutionary computation neural systems consensus theory knowledge representation etc is necessary to create new forms of computational collective intelligence and support existing ones Three subfields of application of computational technologies to support forms of collective intelligence are of special attention to us The first one is semantic web treated as an advanced tool that increases the collective intelligence in networking environments The second one covers social networks modeling and analysis where social networks are this area of in which various forms of computational collective intelligence emerges in a natural way The third subfield relates us to agent and multi-agent systems understood as this computational and modeling paradigm which is especially tailored to capture the nature of computational collective intelligence in populations of autonomous individuals
