Don DeLillo Project Muse:

Representations of Technoculture in Don DeLillo's Novels Laila Sougri, 2023-09-04 This book is the first to explore technoculture in all of Don DeLillo's novels. From *American* (1971) to *The Silence* (2020), the American author anatomizes the constantly changing relationship between culture and technology in overt and layered aspects of the characters' experiences. Through a tendency to discover and rediscover technocultural modes of appearance, DeLillo emphasizes settings wherein technological progress is implicated in cultural imperatives. This study brings forth representations of such implication/interaction through various themes, particularly perception, history, reality, space, architecture, information, and the posthuman. The chapters are based on a thematic structure that weaves DeLillo's novels with the rich literary criticism produced on the author and with the various theoretical frameworks of technoculture. This leads to the formulation and elaboration on numerous objects of research extracted from DeLillo's novels, namely: the theorization of DeLillo's radiance in dailiness; the investigation of various uses of technology as an extension; the role of image technologies in redefining history; the reconceptualization of the ethical and behavioral aspects of reality; the development of televisual and embodied perceptions in various technocultural spaces; and the involvement of information technologies in reconstructing the beliefs, behaviors, and activities of the posthuman. One of the main aims of the study is to show how DeLillo's novels bring to light the constant transformation of technocultural everydayness. It is argued that though such transformation is confusing or resisted at times, it points to a transitional mode of being. This transitional state does not dehumanize DeLillo's characters; it reveals their humanity in a continually changing world.

Real Life Writings in American Literary Journalism: a Narratological Study Gurpreet Kaur, 2015-07-24 This referential collection of essays is an important guide to the emergence and development of literary journalism through the centuries. The book begins with the defining of genres: literature and journalism, which blur the lines between them. It also gives an insight into the theories of narratology. Some practitioners included in this book are great American writers like John Hersey, Truman Capote, Norman Mailer, and Don DeLillo. These literary journalists bring to life both major as well as trivial issues of the society. New journalists coalesce all the fictional techniques with the journalistic methods to present a unique and sophisticated style which requires extensive research and even more careful reporting than done in the typical news articles. The book closes with the concluding thoughts followed by a list of works cited.

Literary Research and American Postmodernism Emily Witsell, 2016-07-18 *Literary Research and American Postmodernism* is a guide to scholarly research in the field of American postmodern literature, which this volume defines as the period between 1950 and 1990. This work aims to provide advanced undergraduate students, graduate students, and scholars of literature with a comprehensive view of the print and online resources available in literature and related subject areas. The volume offers best practices for research, especially for the challenges inherent to the field of American postmodernism, and provides scholars with a path toward success in their research endeavors. The opening chapters describe

the state of academic research in the literary field and how to formulate an appropriate research topic develop keywords and use advanced search techniques to improve search results One chapter is devoted to how to navigate library catalogs read a catalog record and locate materials in libraries worldwide Subsequent chapters describe general reference resources print and electronic bibliographies and scholarly journals that focus on literature in the second half of the twentieth century The author identifies resources for locating the book reviews and historical magazines and newspapers that can offer insight into the history of particular author s publications The unique challenges and promises of archival research are outlined along with tips for getting the most out of a trip to a special collections library to perform primary research Web resources and techniques for finding scholarly resources on the Internet are addressed in addition to subscription based or library owned materials The final chapter synthesizes the information described in the previous chapters by taking the reader through a real life research question and demonstrating how a scholar might locate resources on a difficult topic An appendix of resources in related fields suggests additional directions the researcher might explore

Topologies of Fear in Contemporary Fiction Scott McClintock,2015-07-21 The central concern of the book is the impact of global terror networks and state counterterrorism on twentieth century fiction A unique contribution of this book is the comparative approach as opposed to the single author focus of most of the edited collections on terrorism in literature

Truth to Post-Truth in American Detective Fiction David Riddle Watson,2021-10-25 Truth to Post Truth in American Detective Fiction examines questions of truth and relativism turning to detectives both real and imagined from Poe s C Auguste Dupin to Robert Mueller to establish an oblique history of the path from a world where not believing in truth was unthinkable to the present where it is common to believe that objective truth is a remnant of a simpler more na ve time Examining detective stories both literary and popular including hard boiled postmodern and twenty first century novels the book establishes that examining detective fiction allows for a unique view of this progression to post truth since the detective s ultimate job is to take the reader from doubt to belief David Riddle Watson shows that objectivity is intersubjectivity arguing that the belief in multiple worlds is ultimately what sustains the illusion of relativism

Approaches to Teaching DeLillo's White Noise Tim Engles,John N. Duvall,2006 Don DeLillo s satiric novel White Noise prophetic in 1985 about American society s rampant consumerism information overload overreliance on the media and environmental problems may seem to today s students simply a description of their lived reality The challenge for teachers then is to help them appreciate both the postmodern qualities of the novel and its social critique This volume like others in the MLA s Approaches to Teaching World Literature series is divided into two parts The first part Materials suggests readings and resources for both instructor and students of White Noise The second part Approaches contains eighteen essays that establish cultural technological and theoretical contexts e g whiteness studies place the novel in different survey courses e g one that explores the theme of American materialism compare it with other novels by DeLillo e g Mao II and give examples of classroom techniques and strategies in teaching it e
