ABSTRACT

The directive by the SASRA, to adhere to public procurement is aimed at increasing effectiveness and efficiency and thus enhance competitiveness. The adherence to procurement procedure would ensure the public organization gets the value for money through quality services, good and works, but this has not been effective in other sectors as is expected. The main aim of the study was to assess factors affecting implementation of the public procurement in SACCO societies in Kenya where the main variables include strategic planning, enforcement and organizational culture. Through a descriptive research design, the study targeted procurement officers and general managers working with SACCOs societies which have FOSA. Stratified random sampling technique will be used to select a sample of 20% which makes a sample size of 86 respondents. Quantitative data collected was analyzed by the use of descriptive statistics using SPSS and presented through percentages, means, standard deviations and frequencies. The findings revealed that 55% of the respondent believes that the impact of the regulator on SACCO is high. The findings reveals that on the issue of the SACCO culture favors good procurement procedures, 53% of the respondent strongly agree. On recommendation, the researcher observed that Procurement process should uphold integrity and ensure that there are no malpractices and there is informed decision-making, which requires public bodies to base decisions on accurate information and ensure that requirements are being met.

Key Words: Public Procurement, Implementation, Strategic Planning, SACCO.

INTRODUCTION

This chapter provides the background information of the study. It comprises of the statement of the problem, the objective of the study, justification, limitation, scope and the conceptual framework of the study. Procurement is an important part of efficient management and supply of input and is critical for all levels of any institution. An effective procurement process ensures the availability of the right material in the right quantities, available at the right time, for the right purpose and at reasonable prices, and at recognizable standards of quality (WHO 2007). The regulations are reinforcing professionalism by providing comprehensive performance standards, continuous monitoring and evaluation through regulatory reports. The SASRA 2010
