Dropshipping Made Simple Adidas Wilson, Dropshipping is a method of retail fulfillment where stores do not actually stock their products When someone buys a product the store buys it from another party and then ships it to the

customer directly The merchant neither handles nor sees the product Dropshipping is different from the conventional retail model in that in dropshipping the seller does not own an inventory He or she purchases an order from a third party The dropshipping model like everything else has drawbacks and benefits You need less capital this is arguably the biggest advantage You do not need thousands of dollars to start an ecommerce store Conventional retailers need to have a huge amount of capital to build their inventory In dropshipping you only purchase a product once a customer has placed an order and made the payment An initial inventory investment is not needed Easy to start an ecommerce business becomes much easier to run when you do not handle physical products You will not worry about a warehouse packing and shipping tracking inventory handling returns and much more Low overhead since you will not be dealing with a warehouse or purchasing inventory expect low overhead expenses A lot of people run a dropshipping businesses from their home office with their laptop and only use about 100 per month The expenses may increase as your business grows but they will still be low Flexible location if you have an internet connection you can manage your dropshipping business from anywhere

orders is borne by your suppliers This allows you to expand your business with fewer growing pains Sales growth always brings some extra work In most cases this is primarily related to customer service Companies that exploit dropshipping as a necessity scale exceptionally well especially when compared to conventional e commerce businesses All of these benefits make dropshipping an advantageous and efficient model to both new and established merchants alike Regrettably dropshipping isn't always a bed of roses though All this convenience and flexibility comes with a few disadvantages Let's shed some light on these

[Dropship Guide for Beginners](#) Bri,2015-05-05 Today's savvy e-commerce business owner knows how to compete In years past a business shopped for the products they wanted to resell They then purchased the items and stored them while they searched for an end user or consumer Once the product was sold they shipped the item to their customer and hopefully made a profit This method is costly Besides the price of the item the seller pays shipping from the manufacturer or distributor to his location He then stores the item taking up resources and space until he resells the merchandise He invests time and effort into marketing the item and either he or the end user pays shipping again to their location All of these steps have to be factored into the price of the item to the end user The customer will decide if the end price of the item is a bargain and is competitive As the shipper if the item is lost or damaged in shipping the expense of filing tracking and claims falls on him as well Drop Shipping is a proven way of reducing or eliminating many of these expenses thus making the end price lower for the consumer and more profitable for the seller With drop shipping a seller or retailer does not purchase the item and store it for resell but rather sells the merchandise and ships it directly from the manufacturer to the consumer The seller does not have to store the item or pay shipping from the manufacture to his location He does not have to handle the item himself This reduces chance of loss or damage and speeds up the process considerably He needs less start up money storage rental can be very costly and a product on hand that moves slower than anticipated can create a cash flow problem right out of the gate and can invest more time and money on his sales He also does not have to reship the item and there is only one shipping expense to absorb lowering the price of the item and making it of more value and profit for all concerned If there is loss or damage in shipping it falls on the manufacturer or distributor to provide the documents and file any claims with the shipping company involved Okay so all of this sounds great right But how do you get started This eBook will teach you how So let's get started
