**Language Issues** ,1997

**Fundamental Considerations in Technology Mediated Language Assessment** Karim Sadeghi,Dan Douglas,2023-04-27 Fundamental Considerations in Technology Mediated Language Assessment aims to address issues such as how the forced integration of technology into second language assessment has shaped our understanding of key traditional concepts like validity reliability washback authenticity ethics fairness test security and more Although computer assisted language testing has been around for more than two decades in the context of high stakes proficiency testing much of language testing worldwide has shifted to at home mode and relies heavily on the mediation of digital technology making its widespread application in classroom settings in response to the COVID 19 outbreak

unprecedented Integration of technology into language assessment has brought with it countless affordances and at the same time challenges both theoretically and practically One major theoretical consideration requiring attention is the way technology has contributed to a reconceptualization of major assessment concepts constructs There is very limited literature available on the theoretical underpinnings of technology mediated language assessment This book aims to fill this gap This book will appeal to academic specialists practitioners or professionals in the field of language assessment advanced and or graduate students and a range of scholars or professionals in disciplines like educational technology applied linguistics and teaching English to speakers of other languages TESOL

**Assessing Impairment** Sam Goldstein,Jack A. Naglieri,2009-06-24 Impairment and disability are widely used terms yet considerable disagreement exists as to their relationship especially when impairment means different things to different professionals in the fields of mental health medicine and education Although diagnostic criteria for various disorders are clearly detailed in the DSM IV and elsewhere criteria for impairment remain elusive And patients with severe limitations but minimal symptoms or the reverse further complicate the discussion The first in depth treatment of the theory definition and evaluation of this core concept *Assessing Impairment From Theory to Practice* cuts through the confusion and cross talk Leading scholars and clinicians offer a robust evidence base for a much needed reconceptualization of impairment within the context of diagnosis and disability arguing for a wide ranging quality of life perspective This contextual approach to assessment goes beyond mere symptom counting resulting in more accurate diagnosis targeted interventions and improved patient functioning Within this concise but comprehensive volume coverage focuses on key areas including Current conceptualizations from the DSM IV and other medical models Methodologies for measuring symptom severity and impairment Social behavioral issues such as resilience adaptive behaviors and family environment Developmental issues across the life span Legal and ethical questions and civil rights issues Impairment and disability as they relate to trauma The interdisciplinary model proposed in *Assessing Impairment* gives clinicians vital tools for working with the unique limitations and strengths of every patient Child school and educational psychologists will find it
