Ethical Decision Making And Ethical Leadership:

Ethical Leadership Aidan McQuade,2022-06-06 Ethical leadership does not simply emerge from a code of conduct a good school or a host of good intentions It is an individual choice or rather a series of choices that emerges from the complex interaction of personal values with social imperatives This book explores how and why some people become ethical leaders in morally challenging and complex social environments In Ethical Leadership Aidan McQuade provides insight into the concept of human agency the individual s choice of a course of action in response to the options posed by that individual s engagement with the social world He puts forth a new model of human agency the cruciform of agency which recognises that the potential range of individual action emerges from the nature of the resonance that social options strike with personal thoughts Every action adds to the individual s personal biography in ways that influence subsequent choices by confirming or changing personal values and hopes hence influencing the way the individual subsequently thinks about the world In explaining the potential and limits of human agency for ethical leadership the book establishes a basis for executives policy makers and academics to conceptualise and develop more robust and realistic approaches for the mitigation of some of the most pressing moral issues facing humanity today These include the inter related challenges of modern slavery and global warming which pose such critical threats to the Earth itself In this book McQuade not only sets an agenda for action but empowers individual leaders to find the moral courage to better advance human rights and preserve the environment even when such action requires unpopular choices Events around the book Link to a De Gruyter Online Event in which the author and independent human rights consultant Aidan McQuade together with Bernd Vogel Director of the Henley Centre for Leadership at Henley Business School Joanne Murphy Director of Research Ambassador Luis C deBaca Professor from Practice University of Michigan Law School discuss topics such as what potentially deters leaders from making ethical decisions what can they draw upon both internally and externally to do the right thing when doing so may be unpopular how in the light of fake news can leaders communicate ethically and much more https youtu be EYAAGiCX4cI **Ethical Leadership and Decision Making in Education** Joan Poliner Shapiro,Jacqueline A.
