State and Society in India Brundaban Mishra,Rekha Pande,2026-05-26 The modern Indian State with all its democratic paraphernalia seemed to have never undergone thorough academic scrutiny whether in the mainstream or otherwise Historians political analysts economists and sociologists have all been trying to understand the nature and dynamics of the Indian state and the political system as a whole Gunnar Myrdal described the Indian State as a Soft State due to its inability to eradicate poverty Hamza Alavi introduces the concept of an Over Developed State in South Asia with a strong defense component but whether this applies to India is debated The Marxist thesis on the nature of the Indian state aims to explain the dominant class character of the coalitions that underlie state policies Historically the Indian state has been a product of continuous contestations between colonial and nationalist traditions a legacy that places the very concept of the Indian state in flux Although ideologically the state was based on concepts like the White Man s Burden it did not significantly interfere

with social formations in terms of caste and religious arrangements until it deemed fit to intervene either to maintain order or gain support from a faction Interventions in social formations such as fuelling communalism occurred only when the colonial state sought to create factions within the ruling elite The larger fact remains clear reasonable restrictions and a belief in human reason and individual freedom were largely overshadowed by the coercive apparatus of the military police and law Similarly Bhikhu Parekh argues for the intersection of the modern state deriving from homogeneity and cultural heterogeneity However the ideological deliberations between the three tenets utilitarianism evangelicalism and orientalism shaped the policies of the state that followed each offering different approaches toward governing a vast and diverse land In addition to promoting economic motives such as plantation commercial gains and de industrialization the new state introduced far reaching changes in the structure of education and criminal laws Meanwhile the civil laws of both Hindus and Muslims were largely dominated by elite traditions Some argue that the colonial state was not autonomous in the truest sense as it had to constantly align with the priorities of the traditional elite Fragmentation incoherence and the dilemmas of the postcolonial condition constitute significant features of the contemporary Indian lifeworld India maintains the colonial dichotomy of inner tradition and outer modernity as the semantic framework of cognition and practice Moreover a persisting colonially wedged schism exists between the inner tradition of the socio cultural sphere and the outer modernity of the politico economic sphere Human agents attempt to assign varying significance to different aspects of the world maintaining their identity and politico ethical positioning as responsive beings in inconsistent and problematic situations They achieve this not by consistently adhering to one side of the dilemma but by switching from one side to the other as the situation requires The crucial question arises whether to treat India as a monolithic political entity However the reality is that the Indian State comprises a variety of institutions Political institutions operate within a complex socio cultural matrix at three levels national state and local To locate and understand these institutions in the social matrices in which they are embedded justifies the need for a historical understanding of their inception and historicity as they have evolved over time In short it has become necessary not to treat India as a political monolith but as a compendium of myriad institutions operating in an equally diverse socio economic environment This requires a multidisciplinary approach so that each institution can be understood in relation to its social context Thus the conference aims to have an understanding of the processes of continuity and change in the state and society of India during pre colonial and post colonial times is vital for evaluating the contemporary Indian state In the current era of advanced research there is an increasing scope to answer the historical question What was the nature of Indian society and how was it reflected in the state structure Recently historians have argued that the state in India represented itself as the protector of social norms to legitimize its sovereign power over society and acted as a guiding force for the early development of administrative technology social transformation and trans local and trans continental commercial activities It is argued that its power arose by offering an integral sphere of coordination

competition and contestation between different groups communities and polities Therefore it is important in the present context to historically contextualize the process of regional state formation and the transformation of the relationship between the state and society in a broader perspective in pre colonial and post colonial India *The Routledge Handbook on Global Community Corrections* Ioan Durnescu,James M. Byrne,Benjamin J. Mackey,Faye S.
