Planning and Design for Sustainable Urban Mobility

Un-Habitat,2013-10-30 Urban transport systems worldwide are faced by a multitude of challenges Among the most visible of these are the traffic gridlocks experienced on city roads and highways all over the world The prescribed solution to transport problems in most cities has thus been to build more infrastructures for cars with a limited number of cities improving public transport systems in a sustainable manner However a number of challenges faced by urban transport systems such as greenhouse gas emissions noise and air pollution and road traffic accidents do not necessarily get solved by the construction of new infrastructure Planning and Design for Sustainable Urban Mobility argues that the development of sustainable urban transport systems requires a conceptual leap The purpose of transportation and mobility is to gain access to destinations activities services and goods Thus access is the ultimate objective of transportation As a result urban planning and design should focus on how to bring people and places together by creating cities that focus on accessibility rather than simply

increasing the length of urban transport infrastructure or increasing the movement of people or goods Urban form and the functionality of the city are therefore a major focus of this report which highlights the importance of integrated land use and transport planning This new report of the United Nations Human Settlements Programme UN Habitat the world's leading authority on urban issues provides some thought provoking insights and policy recommendations on how to plan and design sustainable urban mobility systems The Global Report on Human Settlements is the most authoritative and up to date global assessment of human settlements conditions and trends Preceding issues of the report have addressed such topics as Cities in a Globalizing World The Challenge of Slums Financing Urban Shelter Enhancing Urban Safety and Security Planning Sustainable Cities and Cities and Climate Change **Infrastructure Development in APEC**, 1997 *Sustainable Cities* Kimberly Etingoff, 2017-03-16 This title includes a number of Open Access chapters Two trends come together in the world's cities to make urban sustainability a critical issue today First greater and greater numbers of people are living in urban areas and are projected to do so for the foreseeable future Additionally cities contribute to climate change in a significant way and must make systemic changes to mitigate and adapt to climate change effects Urban planners face serious challenges in enhancing sustainability but also have an important set of tools available for creating innovative solutions This book adds to the conversation about the place of urban planning in the creation and maintenance of sustainable cities **Town and Infrastructure Planning for Safety and Urban Quality** Michèle Pezzagno, Maurizio Tira, 2018-07-16 Today citizens advocate greater environmental sustainability better services and the improvement of urban quality by promoting safer mobility especially for the most vulnerable road users Addressing these issues Town and Infrastructure Planning for Safety and Urban Quality contains papers presented at the XXIII International Conference Living and Walking in Cities Brescia Italy 15-16 June 2017 The contributions discuss town planning issues look at best practices and research findings across the broad spectrum of urban and transport planning with particular attention to the safety of pedestrians in the city The main topics of the book are Urban regeneration A focus on walkability vulnerable road users boosting and planning soft mobility Road safety and urban planning vulnerable road users planning for safety integrated land use and transport planning methodological approaches and case studies integrated tools for town and transport planning shaping public spaces and walkability transport solutions for tourism Innovative and traditional solutions for Italian cities Extra European approaches to town and infrastructure planning Different perspectives in road safety prevention infrastructure sharing Advances in road safety Town and Infrastructure Planning for Safety and Urban Quality is a powerful plea for a multi disciplinary and comprehensive approach to urban mobility and planning and will be of interest to academics consultants and practitioners interested in these areas **Sustainable Development of Urban Infrastructure** Xiang Dong Zhang, Hong Nan Li, Xia Ting Feng, Zhi Hua Chen, 2012-12-13 Selected peer reviewed papers from the 2nd International Conference on Civil Engineering and Transportation ICCET 2012 October 27-28 2012 Guilin China *Geographica helvetica*, 2011 **Green Sustainable**
