Organizational Theory in Higher Education Kathleen Manning, 2017-09-14 The second edition of *Organizational Theory in Higher Education* is a comprehensive and accessible treatment of organizational theory and higher education administration. Noted scholar Kathleen Manning offers a fresh take on the models and lenses through which higher education can be viewed by presenting a full range of organizational theories from traditional to current. Chapters discuss the disciplinary foundation, structure, metaphor, assumptions, characteristics, and other elements of each organizational theory and conclude with cases highlighting practical applications. Questions for discussion are provided at the end of each chapter and embedded in the cases to assist the reader in making connections to their practice. Manning's rich interdisciplinary treatment enables readers to gain a full understanding of the perspectives that operate on a college campus and ways to adopt effective practice in the context of new and continuing tensions, contexts, and challenges. New to this Edition: revised chapters with updated material and new references that reflect current higher education issues including climate change; a new chapter on Institutional Theory; an expanded Feminist and Gendered chapter; and an enhanced Spirituality chapter. New cases throughout address contemporary issues and a broader range of institutional types including Historically Black and Hispanic Serving institutions and 2-year institutions. Additional theoretical topics include critical race theory, queer theory, and contemplative practices. Updated and enhanced questions for discussion and recommended readings.

The Psychology of Organizations and Workplace Issues Bernd Huppertz, 2023-12-11 *The Psychology of Organizations and Workplace Issues: Resolving Everyday Conflicts* introduces theories about the psychic life of organizations. Contributions from leading authors in the field will cover the following themes: the organization in the tension field of psychic life and as a field of emotional experiences; individual and group unconscious, regular and irregular psychological processes, and their influence on daily work functions; organization's environment-specific concepts of the psychology of organizations; organizations and workplace issues; social sciences and social psychology. This book is written for everyone interested in the field of organizations. It shows how psychological processes occur in organizations and how they cast their influence throughout.
