Sacred geometry and introspective psychonautics are lost arts that we must recover. Regenerative development and systemic thinking are new approaches that we must incorporate. Thinking

Reality as networks that connect nodes and not as isolated elements in linear sequence is the most concrete basic proposal that the reading of this book offers us Acting generatively as a consequence will be one of the most demanding and relevant challenges of our present time It is on this basis that the following proposal is developed to recover lost knowledge to incorporate it into our mental frameworks and to integrate it with the exercise of modern science and the advent of new technologies It is time to recognize the symbolic and at the same time pragmatic capital that we inherited from our ancestors and it is also time to celebrate the talent and vocation of those who today are leading disruptive development in all fields of knowledge This proposal is not just an exercise in historical or social vindication nor an ode to novelty for the sake of novelty but rather promotes the key guidelines for the design of a roadmap that will allow us to identify and apply the right solutions to the multiple challenges facing our overwhelmed humanity today This book is intended for freethinkers of all ages of all colors and from all corners of the globe it is a wake up call that comes from deep within but it is also a call to action that aims at the most universal
