Environmental Ethics The Big Questions :

Environmental Ethics David R. Keller, 2010-03-15 Through a series of multidisciplinary readings *Environmental Ethics The Big Questions* contextualizes environmental ethics within the history of Western intellectual tradition and traces the development of theory since the 1970s Includes an extended introduction that provides an historical and thematic introduction to the field of environmental ethics Features a selection of brief original essays on why to study environmental ethics by leaders in the field Contextualizes environmental ethics within the history of the Western intellectual tradition by exploring anthropocentric human centered and nonanthropocentric precedents Offers an interdisciplinary approach to the field by featuring seminal work from eminent philosophers biologists ecologists historians economists sociologists anthropologists nature writers business writers and others Designed to be used with a web site which contains a continuously updated archive of case studies [environmentalethics info](#) *Paul Ricoeur and Environmental Philosophy* David Utsler, 2024-08-19 Paul Ricoeur and Environmental Philosophy expands the scope of Ricoeur s hermeneutics to issues of environmental philosophy and discusses the ways in which Ricoeur s hermeneutics has the potential to restructure the discourse and dialogue surrounding environmental issues [Fostering an Ecological Shift Through Effective Environmental Education](#) Kochetkova, Tatjana, 2024-06-05 In the face of our planet s escalating environmental crisis and climate change humanity stands at a crossroads urgently requiring a transformative response The task of averting environmental destruction necessitates not only a shift in our economy and technology but more fundamentally a profound cultural transformation This imperative transformation involves a collective move from the self centered Ego to an ecologically conscious Eco To unravel the complexities of this metamorphosis scholars are turning to the potent tool of environmental education recognized for its capacity to foster personal and social growth while promoting environmental conservation Enter *Fostering an Ecological Shift Through Effective Environmental Education* a groundbreaking exploration into the transformative power of education in the pursuit of sustainable change As readers embark on this scholarly journey the book reveals the profound psychological connection to nature achievable through environmental education It scrutinizes the connection between heightened nature awareness and the adoption of sustainable practices providing valuable insights for educators at various levels The chapters traverse diverse topics from the historical roots of environmental education to the role of indigenous knowledge yoga and eco spirituality within nature education The book s comprehensive approach extends to eco therapy forest school programs and the influence of parents in environmental education By scrutinizing case studies and global movements this work illuminates the achievements and challenges of environmental education on both national and global scales [Transdisciplinary Marine Research](#) Sílvia Gómez, Vera Köpsel, 2022-12-23 Drawing on the expertise of marine researchers from both the natural and social sciences this book examines how we as both scientists and societies can return to a sustainable co existence with the ocean and use the tools of transdisciplinarity to bring together the diverse forms of knowledge needed to achieve this

important task The marine sciences play a vital role in producing and providing the knowledge needed for a transition towards ocean sustainability With a multitude of actors involved in using exploiting and safeguarding the seas however this task cannot be solved by science alone Transdisciplinary research is needed bringing together scientists and all other actors of society to jointly co produce the knowledge and innovations that we so urgently need In this context this book examines and answers key questions at the forefront of transdisciplinary marine research How can we provide approaches that integrate marine biodiversity and social systems in an appropriate relationship What methodologies are most suitable to engage stakeholders in participatory processes providing new knowledge and tools for co designing solutions with balanced socio ecological embeddedness How do we best integrate scientific with lay and local knowledge and how are diverse knowledges valued in engagement activities How can we reconcile socio economic activities and the often divergent values attached to them to provide ethical principles for fair and equitable policy decisions The book addresses these questions by combining an array of chapters about new theoretical approaches to transdisciplinary marine research methodological considerations as well as case studies from the nexus of the research and practices of engagement with a variety of stakeholder groups across the globe This book will be of great interest to students and scholars studying marine science and ocean research across a wide range of disciplines including marine biology environmental governance and policy ocean resource management oceanography environmental anthropology human geography and sustainability It will also be of interest to those looking to build a greater understanding of transdisciplinary research and knowledge co production and practitioners working alongside academics Chapter 1 and Chapter 8 of this book is available for free in PDF format as Open Access from the individual product page at www.routledge.com It has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Environmental Philosophy Simon P. James, 2015-06-03 Climate change habitat loss rising extinction rates such problems call for more than just new policies and practices They raise fundamental questions about the world and our place in it What for instance is the natural world Do we humans belong to it Which parts of it are we morally obliged to protect Drawing on an exceptionally wide range of sources from virtue ethics to Buddhism leading environmental philosopher Simon P James sets out to answer these vitally important questions The book begins with a discussion of animal minds before moving on to explore our moral relations with non human organisms ecosystems and the earth as a whole James then considers environmental aesthetics humanity s place in the natural world and the question of what it means to be wild In the concluding chapter he applies his findings to the topic of global climate change building a strong moral case for urgent action This accessible entertainingly written book will be essential reading for students of the environment across the humanities and social sciences It will moreover be an ideal guide for anyone keen to deepen their understanding of environmental issues
