

Implementation of Smart Helmet

4 people die every hour in India because they do not wear a helmet. In 91 per cent cases of two-wheeler accidents, a non-helmet rider was hurt.

Introduction:

"Implementation of smart helmet" refers to the development and deployment of a helmet that is equipped with various electronic components and sensors, such as GPS, accelerometers, and communication modules.

The purpose of "implementing a smart helmet" is to provide additional safety features and functionality to traditional helmets. For example, a smart helmet might include sensors that detect impacts and automatically alert emergency services or a designated contact if an accident occurs. It might also include a communication module that allows the rider to receive navigation instructions or communicate with other riders in a group.

Let's talk about "smart helmets" in detail. A smart helmet is a high-tech protective gear for motorcyclists that integrates advanced technologies such as sensors, cameras, and communication devices to enhance the rider's safety and comfort. Smart helmets can perform various functions such as monitoring the rider's vital signs, detecting possible road hazards, providing navigation, and communicating with other riders or emergency services.
