

Personal Philosophy on Advanced Practice Nursing and Healthcare

Introduction

Caring, which is a mainstay characteristic of nursing practice, has been christened as a complex process that is grounded on professional and ethical contexts. While examining the nursing ethos that safeguard the right of patients to human dignity, Judge-Ellis and Wilson (2017) identified caring as a primary moral obligation of the ethical frameworks underlying these ethos. I chose to become an advanced practice nurse because my demeanor and my disposition are adequately suited for providing this care.

Nursing philosophy is an integral element that helps in the identification of the approach that a nursing practitioner adopts towards delivering his or her professional obligations (Marchuk, 2014). The purpose of this paper is to outline my personal philosophy on advanced practice nursing and healthcare with respect to my future role as an advanced practice nurse. In this paper, my personal philosophy concepts that are specific to the nursing metaparadigms are established from published philosophies. Through evidence-based justification of theory, this paper explains how Peplau's Theory of Interpersonal Relations relates to my future practice nursing role and my personal philosophy. To provide ethical and compassionate care to the patients in a healing environment, there needs to be reciprocity between the nurses and the patients, as this is the bedrock of patient-centered treatment care.

Advanced Practice Nursing Philosophy

With the implementation of the Patient Protection and Affordable Care Act of 2010, more emphasis has been dedicated towards identifying the roles of healthcare professionals in guaranteeing the safety and safeguarding the rights of the patients (American Nurses Association, 2018).

The Nurse as Executive Barbara Stevens Barnum, Karlene M. Kerfoot, 1995 This new edition of Aspen's bestselling book *The Nurse as Executive* has been thoroughly revised and updated to reflect the significant changes in nursing management. The nurse executive's role as a member of the executive team is examined as well as the nurse executive's role in health care issues such as quality outcomes, team building, and cost containment. Organizing the book around the new resource-driven management model rather than the goal-driven management model makes this book unique and distinguishes it from other management texts.

Management and Leadership for Nurse Administrators Linda Roussel, Richard J. Swansburg, Russell C. Swansburg, 2006 Designed for the management and development of professional nurses, this text provides management concepts and theories giving professional administrators theoretical and practical knowledge enabling them to maintain morale, motivation, and productivity. Organized around the four management functions of Planning, Organizing, Leadership, and Evaluation, it includes new chapters on total quality management, the theory of human resource development, and collective bargaining. Additionally, content has been added to include recommendations from the work of the Institute of Medicine and the Magnet Appraisal process.

Social Theory and Nursing Martin Lipscomb, 2016-12-08 Despite noteworthy exceptions, nursing's literature largely disregards the ways in which social and sociological theory permeates, guides, and shapes research, education, and practice. Likewise, social theory's ability to position nursing within wider structures of healthcare and educational provision is similarly and puzzlingly downplayed. The questions nurses ask and the problems they face cannot, however, adequately be addressed without engaging with social and sociological theory. To progress this engagement, contributors to this book explore how social theories are used by and might apply to nursing and nursing practice. The book draws on a wide range of perspectives: philosophical, theoretical, empirical, and political, to offer a robust and wide-ranging critique and analysis. *Social Theory and Nursing* is essential reading for nursing researchers, academics, and educators, as well as scholars and researchers in medical sociology, medicine, and allied health.

Nurses as Leaders William Rosa, 2016-06-13 Integrates the perspectives of contemporary nurse leaders to foster an innovative, collaborative future. Encompassing the wisdom of both established and emerging nurse leaders, this expansive book demonstrates proof of theory in action and the influence of our great nursing legacy on today's luminaries as they carve out new terrain to benefit current and future health care needs. With a far-reaching, ambitious perspective, it is the first text to link the ideas of nurse leaders from very diverse specialty areas, including holism, advanced practice, education, policy, global health, journalism, and spiritual communities. The book examines the professional and scholarly accomplishments of these nurse leaders within an historical context and facilitates succession planning for the next generation through a combination of outcomes-based writing, storytelling, and personal reflection. Dozens of expert contributors from practice and theory arenas describe how to develop leadership skills and tactics through the implementation of local, national, and international initiatives. With an eye to creative evolution in

education research and clinical settings they discuss how emerging nurse leaders can be agents of change beyond the confines of traditional practice and curricula through innovation and collaboration Contributors also relate the circumstances and experiences that sparked their nursing passions the moral ethical foundation from which they practice and inspired messages toward communal societal and global impact within nursing of the future Each chapter author follows a template to ensure continuity and includes end of chapter reflection questions Key Features Distills the perspectives of current and emerging nurse leaders from a diverse array of specialty areas to unify the collective of nursing Redefines praxis possibilities in education research and practice Outlines contributing nurse leaders practical and scholarly accomplishments Describes how to facilitate change through innovation and collaboration Teaches the development of leadership skills and tactics

[a 1 9 ghz double balanced subharmonic mixer for direct](#) - Nov 14 2022

the ad831 is a low distortion wide dynamic range monolithic mixer for use in such applications as rf to if down conversion in hf and vhf receivers the second mixer in dmr base

[difference between unbalanced single and double balanced](#) - Nov 02 2021

an ism band direct down conversion double balanced mixer for - Apr 19 2023

oct 14 2022 in this study the design of a direct down conversion double balanced gilbert mixer at 432 mhz is presented the proposed circuit achieves a 13.4 db double sideband

design and optimization of a direct conversion - Mar 18 2023

jan 2 2021 the simulated response of the proposed mixer shows a conversion gain of 12 db iip3 point of 8.3 dbm and one db compression point of 8.5 dbm 1 introduction multiband and

broadband direct conversion transmitter receiver at d band - May 20 2023

the direct conversion transmitter starts with an active double balanced gilbert cell followed by a driver amplifier a 9.1 frequency multiplier circuit realized by two successive tripler stages

designing of double balanced gilbert mixer for direct conversion - Jun 21 2023

oct 28 2018 this paper presents the designing of double balanced cmos mixer for direct conversion receiver operating at a frequency of 2.4ghz in 180nm cmos technology using

design and optimization of double balanced gilbert cell mixer in - Jul 22 2023

dec 1 2020 an improved design procedure for double balanced gilbert cell mixer is proposed for specific gain and power requirements at various license exempted frequency ranges for a
