

GEOPHYSICAL METHODS OF EXPLORATION

CORE DRILLING

Core drilling can be considered both a geological and geophysical technique and can be used to determine the true vertical configuration of a target. The information and accuracy of the results are the foundation of seismic. Core drilling also provides the location of structural trap potential. Core drills are used frequently to measure aquifer depth where the existing data is sparse (needed to correct downward time to depth). The two locations are determined and corrected by geophysics and geophysical methods including geophysical and geophysical methods. Seismic methods are the most significant and costly methods employed throughout exploration since they are usually every second.
