Error Analysis And Second Language Acquisition:

Error Analysis Jack C. Richards, 2015-12-14 The eleven essays in this book cover a wide range of topics from the role of interlanguage and the influence of external factors on the process of language learning to the development of syntax and the methodology of error analysis Collectively they provide a valuable perspective on the learning process which both enriches our theoretical understanding of the processes underlying second language acquisition and suggests ways in which teaching practice may best exploit a learner's skills

Abstract Error Analysis used in second language analysis studies the errors learners make in speech and writing It also studies the different types of errors and why they were made In this term paper two different types of learners will be considered who perform spontaneously with the help of a picture story There will be a special focus on the differences and similarities of their errors There are various possibilities how samples of learner language can be influenced Firstly the learner and his proficiency level have to be described and it is important if he speaks or learns other languages irrespective of the MT and the target language that is considered in the analysis The way of instruction plays also an important role because instructed language learning provides a different error background as if the learner tries to learn the language naturalistically The second part that has to be described is the language itself The medium can either be oral or written Generally the oral production consists of a more colloquial English for the simple reason that the learner has not as much time to think about formulation than in written speech Therefore the Genre and the content of the language production is Error Evaluation and Error correction are additional parts that have not to be included in every Error Analysis According to the dictionary of Linguistics the error analysis is subdivided and classified in modality levels of linguistic description form type and cause

Error Analysis in SLA. An Investigation of Errors made by Polish Learners of English Tom Keller, 2016-04-13 Seminar paper from the year 2010 in the subject English Language and Literature Studies Linguistics grade 3,0 Technical University of Braunschweig
Englisches Seminar course Second Language Acquisition language English abstract In this paper I will investigate several language productions from Polish learners using the English language and try to uncover their errors Using Error Analysis I will describe and explain the reasons for the error production An interesting question will be whether the Polish speakers may have typical errors which could be related to their native language Due to the numerous kinds of errors it will be necessary to classify them and to relate them to certain reasons Furthermore there exists a difference between an error and a mistake Its importance will be discussed later on Even though Error Analysis initially offers helpful opportunities to investigate error production in a structured way it has several disadvantages which were criticized in past decades In the end the conclusion will give an overview of the contents and summary the handled topics During the last several decades linguists have

investigated the way of acquiring a second language Learners have several ways of acquiring a language and the field of second language acquisition SLA tries to uncover and improve them When people try to learn a foreign language they produce a considerable amount of errors These errors have always been made in the learning process and will never cease to occur During the complex investigations of second language acquisition linguists have focused on Error Analysis EA with its aim to take a deeper look on learner production Around the late 60 s this particular analysis was established with an approach of Pit Corder This system shows that errors should be investigated to understand and also improve the linguists attempts of learning a second language Typical questions which arise are why learners make errors and what reasons do they have Before Pit Corder linguists used the Contrastive Analysis CA which examines certain errors and refers to a particular connection between the first and the second language The differences between these two types of analysis will be examined in detail in the following chapter Several steps are needed to analyze various errors in language Investigators have developed procedures to collect identify describe explain and lastly evaluate certain errors These certain steps will be described and underlined with certain examples
