  - a. The fossil organisms and modern organisms have identical body sizes
  - b. The fossil organisms and modern organisms have homologous body structures.
  - c. The fossil organisms are hundreds of thousands of years old, and modern organisms have been around for hundreds of years
  - d. The fossil organisms are found in many different rock layers, and modern organisms live in many different habitats.

### Embryology

Organisms that are closely related may also have physical similarities before they are even born! Take a look at the six different embryos below:

These are embryos at their most advanced stage, shortly before birth.

1. Look again at the six embryos in their earliest stages. Do the early stages of embryos look the same?
2. Does this suggest that the embryos have a common ancestor?
