

**CHAPTER 5: RESEARCH DESIGN AND METHODOLOGY****5.1 INTRODUCTION**

In Chapter One an orientation of the research was provided. This study focuses on the needs and competencies of school sport managers. These are required for the sport management training of educators, in accordance with the diverse needs of South African schools (cf. par. 1.3.2, p. 12). As a result of the problem statement referred to in Chapter One, the all-encompassing aim of this study is to develop a sport management programme for educator training. It is essential to analyse the existing knowledge, as a background to the current study. In this way, the researcher endeavours to generate new knowledge, which could make sport management and educator training more purposeful, efficient and sustainable. Consequently, this chapter strives to operationalise the theme of the research design and methodology in the current study, as well as to substantiate the choices made in the study.

The research design is applied so that suitable research methods are used to ensure the attainment of the goals and objectives set out in Chapter One. Hence the **reason (rationale)** for a discussion of the research design and methodology: Firstly, this is to provide the plan or blueprint for the research. Secondly, this should enable the researcher to anticipate the appropriate research design, to ensure the validity of the final results. Nevertheless, it is important that different views are analysed; thereafter, the methodology will be discussed. However, first it is important to consider a theoretical framework for the research design.

**5.2 THEORETICAL FRAMEWORK FOR THE RESEARCH DESIGN AND METHODOLOGY**

One of the challenges facing the researcher is the difficulty in relating to and understanding the role and importance of theory in research. Consequently, the concept of theory necessitates some clarification. In this regard, Verma and Mallick (1999:6) as well as Blumberg, Cooper and Schindler (2011:36) are of the opinion that the main role of theory is to help to guide the researcher. In the social sciences, it usually implies a set of statements describing and explaining the relationship between human behaviour and the factors that affect or explain it. Paraphrasing Best and Khan (2006:10), a theory could best be described as an attempt to develop a general explanation for some phenomenon. More specifically, a theory, according to these authors, defines non-observable constructs that are inferred from observable facts and events, and are thought to have an effect on the phenomenon under study. It further implies that a theory describes the relationship among key variables for explaining a current state or predicting future concurrences.

*Optimum Capital Structure* Lutfa Ferdous, 2019-05-23 Thesis M A from the year 2009 in the subject Business economics Economic Policy grade M B A University of Dhaka course Master of Finance language English abstract Capital structure is one of the most converse and vital issues both in finance literature and practical research This research deals with the theoretical and empirical aspects of capital structure decision It is observed that the determination of debt ratio is subtle and sophisticated to determine and its estimation is still a matter of debate and yet there is no entirely satisfactory theoretical model for forecasting the optimal debt ratio in the firm s capital structure There is little consensus on how firms choose their capital structure and how the firm specific factors influence the shape of the capital structure This research develops a link between theory and practice of capital structure This study has supported a set of sample firms to show the impact of six factors determinants on the financial leverage and how they comply with the findings derived by different previous theories regarding these factors Least Square method has been used to assess the influence of defined explanatory variables on the capital structure by using the dataset of Bangladeshi manufacturing firms for the period 2000 to 2004 Out of Six examined explanatory variables agency equity agency debt Bankruptcy profitability are statistically significant determinants of financial leverage Otherwise growth rate and operating leverage are found to be insignificant Agency equity agency debt bankruptcy operating leverage profitability growth rate all these are showing a negative relation with the dependent variable Also this paper suggests that the institutional context and macroeconomic events play an essential role in the capital structure

decisions of Bangladeshi companies It would seem appropriate that further research should focus on the role played by the institutional framework such as the impact of taxation the practice of good corporate governance legal and regulatory structure
