Federal Aviation Administration,1987 **The Checkride Checklist** Krishnan Swaminathan,2020-04-13 The solution to your nagging questions about your upcoming FAA Private Pilot practical test How do you explain the many topics you need to know There s SO MUCH to know where do you start You ve done all of this yourself how do you know it s enough What are the standards expected of you And many more similar questions Sound familiar Then this is the book for you **Top Ten Check Ride Tips** Kenny Keller,Dan Christman,2018-07-26 From 2018 Flight Instructor Of The Year Dan Taz Christman and The Creator of Helicopter Online Ground School Kenny Keller Top Ten Check Ride Tips Dedicated to all those that suffer from the hype created by others about the dreaded Helicopter Checkride If you apply yourself remember that we learn through repetition go over the content repeatedly Use our checkride tips to keep yourself calm you will do just fine In this short read we cover our top ten checkride tips These tips are very basic but that s the key People screw up on checkrides because of very basic things As we get into our tips for the checkride we want to add our normal disclaimer Remember that it is up to you to know the procedures for your aircraft and your environment We re going to provide some tips some things that I ve seen in 20 years of instructing that are very basic These may be basic but they are things that I don t want you to

overlook It doesn't matter whether it is taking you three months six months two years four years or more The time varies for anybody going for a checkride You are preparing the whole time you are flying Your instructor is doing his job working with you You're working through the PTS and you're doing what you are supposed to be doing So often it is the last minute issues that bite people in the rear When I say to start three weeks in advance I mean to start getting the materials ready three weeks in advance of the day of the checkride I am always amazed that students will show up to a checkride without CURRENT Aeronautical Charts FAR AIM PTS or Chart Supplements formally AFD There is nothing worse than on the night before the checkride thinking I don't have a chart I don't have an E6B I don't have this I don't have that It is the most horrible feeling in the world for you and a horrible feeling for your instructor because you both look unprepared showing up at the checkride trying to sneak through saying Well I couldn't get this in time or I forgot that It just doesn't look good If it is required you will not be able to take the test You want to show up at the checkride prepared I just picked three weeks as a general rule I used to say one or two weeks but I love the number three You should have everything that you need for the day of the checkride three weeks in advance You should have all the tools and things that we talk about three weeks in advance of that checkride Everything you need is listed in the PTS page 1 xi under Applicant's Practical Test Checklist We will provide a copy of the checklist in the Appendix Much of these items are now available digitally and can be updated within a few minutes The FAA has now approved the use of these digital products for checkrides but I would check with your DPE as to what he expects There are a few old hats out there that might still want you to demonstrate on paper as a backup A note on the use of digital products Tablets have an uncanny knack for over heating or running out of battery right at the most inopportune time Have a plan ready should this happen I had a student who was using his iPad for his instrument check Halfway through the first approach it over heated He had to land and print out the subsequent approach plates Lucky for him his examiner was being generous That might not always be the case
