CHAPTER 1 - INTRODUCTION

Project Context

In today's generation, we are engaged in highly computerized technology aiming to make individual lifestyle more comfortable and easier most especially in the world of business. The manual system is now considered the first process after the birth of the computerized system. Online transaction is now very common to widen the target market of the company. It becomes more efficient to the customer considering it can save time and considered hassle-free. The most commonly used system by several companies is the sales system and inventory system creating a web-based system. Advanced system on sale provides more reliable recording of sales of the company with comparison to its actual cost. In addition to the data information needed by the company to decide matters in relation to inventory can be easily generated. Moreover, the inventory control which ensures stocking the in-demand and correct items in the correct quantities.

This sales and inventory system can help the company to avoid overstocking. When the company overstock, the fund will not back easy because the cycle of the stock is a stop for unneeded items required time, space, and fund which could have been used on more critical assets.

The computer is a useful technology in our society that makes our work easy to wrap-up. Nowadays, computer technology continues to evolve and grow fast. Then every business in our society started shifting from using the manual system to an automated one that makes our work easier and faster.

Point of Sales and Inventory System is a computer is an easy way of checking and listing of the sales of the company, it is faster and more reliable rather than doing manually. The system can minimize human errors in editing and be easily access anytime by the company. Sales and inventory system make the company more effective, more productive and is convenient for the company and its customers. The system is making to help the establishment show more relevant items to the customers.

Purpose and Description

The purpose of the Point of Sales and Inventory system is to serve customers efficiently. This study aims to help the staff/employees of TH Garment Center make their work faster by using the system where they can monitor the remaining products in the records where they can see in the database. The system will provide a good service to the company like better transaction process that brings bigger profit.

General Objective

The main objective of this research is to improve the manual system of TH Garments in checking and adding the stock from the supplier. The new system can fix the problem in managing records for easier monitoring and tracking and help the workers to have a faster way of recording details of each transaction.

Federal Software Exchange Catalog, 1986 Inventorying Cultural Heritage Collections Sandra Vanderwarf, Bethany Romanowski, 2022-03-14 This two part text opens with an argument few collections practitioners would contest Regular inventories are central to meaningful sustainable and ethical collections preservation and access But Vanderwarf and Romanowski argue that in practice some 25 years working with diverse collections between them inventories are uncommon instead of functioning as a commonplace feature of collections care they tend to be evoked as a last resort when a museum has lost control of its collection Part I offers a flexible project management framework that illustrates strategies for reining in control of collections now From identifying objectives that best serve the collection in question to securing stakeholder support and planning time and resources Part I eliminates some guesswork around what may be an unprecedented and intensive project To maintain the benefits of a project style inventory the authors then encourage practitioners to embrace inventory as an ongoing evolving collections care function that reflects changing professional values and expectations from the communities museums serve By centering computerized databases barcoding and digital collections the authors further acknowledge these technologies as permanent evolving features of collections and inventory practice that merit increased resourcing Part II gives voice to practitioners around the world through case studies that affirm the vital role of inventories in regaining control of collections Some of these inventories occurred during the course of everyday work while others were

responses to natural disasters and armed conflict Still others may be seen as expressions of social justice As much as the authors offer a guide to performing inventories thereby filling a longstanding gap in the literature they invite cultural heritage institutions to rethink how the stories held in collections can be better told and preserved through enhanced inventory practice The book will benefit seasoned museum collections practitioners as well as those who lack access to formal museology education and training The book targets stewards of cultural heritage and material culture collections with varying resources
