*Stewardship* John G. Taft, Charles D. Ellis, 2012-02-07 A compelling argument for why stewardship of wealth and service to others should be our highest financial priority Stewardship is the journey of financial insider John Taft towards understanding and affirming the importance of stewardship which he has come to define as serving others as a core principle for the financial services industry the global financial system and society at large By defining the attributes of authentic stewardship this book presents a path forward by analyzing the success of Canadian banks in weathering the financial crisis evaluates the effectiveness of global financial reform efforts in making the financial system safer sounder and more secure offers wealth management prescriptions for individual investors evaluates the potential of ESG environmental social and governance investment processes as a way to instill stewardship behaviors among corporate CEOs particularly at financial services firms and ultimately calls for a return to stewardship's core principles as the key to not only minimizing the scope and consequences of future failures but also to addressing other societal challenges Argues for a return towards stewardship with financial services companies doing right by their customers Analyzes the response of Canadian banks to the financial crisis to provide meaningful advice for investors and businesses alike Inspired by Taft's experience running one of the largest wealth management firms in the country during the financial crisis and his direct participation in subsequent legislative and regulatory efforts to rewrite the rules under which the U S securities industry operates From the man who made the decision to reimburse clients affected by the collapse of a money market mutual fund comes a compelling look at why financial service companies should start doing what's right for their customers

*Incompleteness for Higher-Order Arithmetic* Yong Cheng, 2019-08-30 G del's true but unprovable sentence from the first incompleteness theorem is purely logical in nature i.e. not mathematically natural or interesting An interesting problem is to find mathematically natural and interesting statements that are similarly unprovable A lot of research has since been done in this direction most notably by Harvey Friedman A lot of

examples of concrete incompleteness with real mathematical content have been found to date This brief contributes to Harvey Friedman s research program on concrete incompleteness for higher order arithmetic and gives a specific example of concrete mathematical theorems which is expressible in second order arithmetic but the minimal system in higher order arithmetic to prove it is fourth order arithmetic This book first examines the following foundational question are all theorems in classic mathematics expressible in second order arithmetic provable in second order arithmetic The author gives a counterexample for this question and isolates this counterexample from the Martin Harrington Theorem in set theory It shows that the statement Harrington s principle implies zero sharp is not provable in second order arithmetic This book further examines what is the minimal system in higher order arithmetic to prove the theorem Harrington s principle implies zero sharp and shows that it is neither provable in second order arithmetic or third order arithmetic but provable in fourth order arithmetic The book also examines the large cardinal strength of Harrington s principle and its strengthening over second order arithmetic and third order arithmetic
