How was it a "...response to women's participation in the American Revolution, Enlightenment ideas, and women's appeals for expanded roles..." What was its effect on American cultural, social, and political life?

Republican motherhood was the belief that women should have more rights so they could help more with their families in political ideas in society. It was a response to women's participation in the revolution, Enlightenment Ideas, and womens appeal for expanded roles because women began having more important roles, education was opening up to women. Women started to argue about the beliefs of a man, and when men left for war, women who were at home would do what they did when they were gone.

2. How did George Washington "create institutions and precedents" that put the Constitution into practice? How was he responsible for creating precedents that the new government followed? What did John Adams do during his presidency that was responsible for precedents?

George Washington created institutions and presidents to put the constitution during presidential administrations. He was responsible for creating precedents that the new government followed by addressing important issues throughout the United States. This would later get enforced in the constitution. John Adams was responsible for precedents as he would create a navy, tried to continue peace with other nations, and provided funds for future wars to come.

Applying Positive Character Traits To The Study Of U.S. History: A Teacher's Resource Book Richard Reed Miller II, 2026-03-07 This is a U S history teacher s resource book and does not include any Scripture of any religion But it does teach ethical decision making to students in another way The book uses the positive character traits of positive psychology to examine the decision making of Americans in the past You can do this without presentism by emphasizing the people then lived in different times But students can still examine the ethics of their decisions and how they interacted with ideas about wealth power democracy equality etc at the time These types of nuanced discussions help students understand the strengths and weaknesses of decisions made in the past and how some positive character traits were emphasized for a decision while others were excluded It shows the trade offs humans sometimes make in their decisions Students engage in group discussions Socratic seminars simulations and other activities to learn how decisions were made in the past and how to possibly make ethical decisions in the future in our country They learn which positive character traits they may want to incorporate into their own lives to make decisions One simulation has them work on different problems for our country in a simulated Congress to make joint ethical decisions to solve the problems At the end of the book there is a chapter about how the development of human rights laws through time in America represents a type of national Code of Ethics that was earned after many people suffered went to war or were discriminated against The history of the development of these human rights laws is examined in the chapter
