Mathematical Statistics George R. Terrell,1999-06-04 This textbook introduces the mathematical concepts and

methods that underlie statistics The course is unified in the sense that no prior knowledge of probability theory is assumed being developed as needed The book is committed to both a high level of mathematical seriousness and to an intimate connection with application In its teaching style the book is mathematically complete concrete constructive active The text is aimed at the upper undergraduate or the beginning Masters program level It assumes the usual two year college mathematics sequence including an introduction to multiple integrals matrix algebra and infinite series

An Introduction to Mathematical Statistics Fetsje Bijma, Marianne Jonker, Aad Vaart, 2025-10-01 Statistics is the science that focuses on drawing conclusions from data by modeling and analyzing the data using probabilistic models In An Introduction to Mathematical Statistics the authors describe key concepts from statistics and give a mathematical basis for important statistical methods Much attention is paid to the sound application of those methods to data The three main topics in statistics are estimators tests and confidence regions The authors illustrate these in many examples with a separate chapter on regression models including linear regression and analysis of variance They also discuss the optimality of estimators and tests as well as the selection of the best fitting model Each chapter ends with a case study in which the described statistical methods are applied This book assumes a basic knowledge of probability theory calculus and linear algebra
