**Project Abstract**

In Modern world, Automation is used in many of the fields such as defense, surveillance, medical field, industries and so on. This solar powered automatic machine used to develop the process of ploughing agricultural land without the use of man power. The aim of this project to reduce the man power, time and increase the productivity rate and reduction of fuel usage since it is solar powered. All the basic ploughing equipments such as ploughshare and some tillage machines and so on are in use with use of man power. The issues involved in basic equipments are the availability of tractor, fuel usage and cost. These issues are overcome by this project. This project is to plough the land to the depth of 30cm without use of tractor and watering the land whenever water is needed by using moisture sensor. The ploughing and watering process is remote controlled.
