**Building Practices for Disaster Mitigation** Richard Newport Wright, Samuel Kramer, Charles G. Culver, 1973 The National workshop on building practices for disaster mitigation was concerned with earthquakes extreme winds and similar dynamic hazards These proceedings present recommendations derived at the workshop and addressed to policy makers in government and industry as well as practitioners in engineering architecture land use planning and the earth and meteorological sciences The recommendations evaluate current building practices define opportunities for improving current practice from documented research findings and recommend research to fill gaps in knowledge The objectives include avoidance of human suffering reduction of property loss and maintenance of vital function in buildings under conditions threatening disaster Fifteen review articles were prepared by experts in the professions and research disciplines to define the state of the art in disaster mitigation and to guide discussions at the workshop the articles are included in the proceedings Author

**Recovering from Earthquakes** Shirish Patel, Aromar Revi, 2012-07-26 Earthquakes come without warning and often cause massive devastation resulting not only in the loss of property but also of lives Many of the survivors suffer from intense and lasting psychological trauma This book covers the experience of recent earthquakes in India and what has been learnt and what we have failed to learn in the process of managing the aftermath in each case This includes immediate medical attention long term mental health care and the reconstruction of housing and infrastructure in both rural and urban areas The experiences of the contributors many of whom have actively contributed their expertise to disaster management and recovery help us understand what problems require a swift response and which aspects should be based on detailed analyses keeping in mind local conditions Reconstruction is seen as offering an opportunity to rebuild society such that all sections of the population are empowered and brought into the community's decision making process It is also an opportunity to develop construction techniques that are suited to local materials and skills but are also more earthquake resistant than the old And finally there is the realisation that the best first responders are local community groups which need to be nurtured and trained in crisis management and risk mitigation
