### **Contact and Long-Term Behavior of Current-Carrying Connections in**

**Electrical Power Engineering** Stephan Schlegel,Michael Gatzsche,Christian Hildmann,Toni Israel,2024-11-16 This book summarizes insights into stationary high current connections across all voltage levels These are applied in existing facilities and for new constructions in electrical power engineering e mobility and battery storage technology Current carrying stationary connections are indispensable in countless applications Complex systems often fail due to inadequate or heavily loaded connections A large number of these connections are assembled and must function reliably over their required lifespan To ensure this under current demands correct conductor and coating materials must be chosen robust design and construction ensured proper installation guaranteed and a secured temperature limit for the desired lifespan considering environmental conditions must be known The book covers theories on contact physics key conductor and coating materials factors influencing electrical contact behavior the relationship between mechanical and electrical contact behavior aging physics and long term behavior under various operating and environmental conditions along with design criteria for construction Additionally it presents approaches to numerically model electrical mechanical thermal behavior introduces evaluation criteria and outlines qualification testing methods It serves as a comprehensive reference based on scientific research and practical insights from the past 40 years

### **Comprehensive Materials Processing ,2014-04-07**

Comprehensive Materials Processing Thirteen Volume Set provides students and professionals with a one stop resource consolidating and enhancing the literature of the materials processing and manufacturing universe It provides authoritative analysis of all processes technologies and techniques for converting industrial materials from a raw state into finished parts or products Assisting scientists and engineers in the selection design and use of materials whether in the lab or in industry it matches the adaptive complexity of emergent materials and processing technologies Extensive traditional article level academic discussion of core theories and applications is supplemented by applied case studies and advanced multimedia features Coverage encompasses the general categories of solidification powder deposition and deformation processing and includes discussion on plant and tool design analysis and characterization of processing techniques high temperatures studies and the influence of process scale on component characteristics and behavior Authored and reviewed by world class academic and industrial specialists in each subject field Practical tools such as integrated case studies user defined process schemata and multimedia modeling and functionality Maximizes research efficiency by collating the most important and established information in one place with integrated applets linking to relevant outside sources
