Project Documentation For Mobile Banking System

Oliver Cornock

Project Documentation For Mobile Banking System:

Research Handbook on Central Banking Peter Conti-Brown, Rosa Maria Lastra, Central banks occupy a unique space in their national governments and in the global economy. The study of central banking however has too often been dominated by an abstract theoretical approach that fails to grasp central banks' institutional nuances. This comprehensive and insightful Handbook takes a wider angle on central banks and central banking focusing on the institutions of central banking. By institutions Peter Conti Brown and Rosa Lastra refer to the laws, traditions, norms, and rules used to structure central bank organisations. The Research Handbook on Central Banking's institutional approach is one of the most interdisciplinary efforts to consider its topic and includes chapters from leading and rising central bankers, economists, lawyers, legal scholars, political scientists, historians, and others. *The 2015 Brookings Financial and Digital Inclusion Project Report* John Villasenor, Darrell West, Robin Lewis, 2015-10-06. The 2015 Brookings Financial and Digital Inclusion Project FDIP Report and Scorecard evaluate access to and usage of affordable financial services across 21 geographically and economically diverse countries. The 2015 FDIP Report and Scorecard seek to answer a set of fundamental questions about today's global financial inclusion efforts including: 1. Do country commitments make a difference in progress toward financial inclusion? 2. To what extent do mobile and other digital technologies advance financial inclusion? and 3. What legal policy and regulatory approaches promote financial inclusion? John D. Villasenor, Darrell M. West, and Robin J. Lewis analyzed the financial inclusion landscape in Afghanistan, Bangladesh, Brazil, Chile, Colombia, Ethiopia, India, Indonesia, Kenya, Malawi, Mexico, Nigeria, Pakistan, Peru, the Philippines, Rwanda, South Africa, Tanzania, Turkey, Uganda, and Zambia. Countries received scores and rankings based on 33 indicators spanning four dimensions: country commitment, mobile capacity, regulatory environment, and adoption of traditional and digital financial services. The authors' analysis provides several takeaways with respect to expanding financial inclusion across diverse cultural, economic, and political contexts. Country commitment is fundamental. Movement toward digital financial services will accelerate financial inclusion. Geography generally matters less than policy, legal, and regulatory changes, although some regional trends in terms of financial services provision are evident. Central banks, ministries of finance, ministries of communications, banks, nonbank financial providers, and mobile network operators play major roles in achieving greater financial inclusion. Full financial inclusion cannot be achieved without addressing the financial inclusion gender gap. This year's Report and Scorecard are the first of a series of publications intended to provide policymakers, the private sector, nongovernmental organizations, and the general public with information that can help improve financial inclusion in these countries and around the world. The Report: Peru 2016 Oxford Business Group, 2016-02-11. In the decade to 2014, Peru became one of the fastest growing economies in Latin America with an average annual real GDP growth rate of 6.2%, second only to Panama (8.2%) and well ahead of the Latin American and Caribbean average (3.4%). The strong pace of economic growth during a decade-long commodities-led economic boom tripled Peruvian GDP and led to a major reduction

in the poverty rate which fell from nearly half the population 49.2% in 2006 to under a quarter 23.9% in 2013. However the end of the commodities cycle saw GDP growth slow to an estimated 2.5% in 2015 according to the IMF. In 2016 the mineral rich Andean country faces some uncertainty with general elections scheduled for April 2016 the occurrence of the El Niño weather pattern and continued external headwinds. Even so a recovery is expected to begin with growth forecast to reach 3.3% in 2016 on the back of increased mining activity and continued public spending on major infrastructure projects. **The Report: Papua New Guinea 2012**, 2012.
