International Conference on Applied Technologies Miguel Botto-Tobar, Lohana Lema Moreta, Marcelo Zambrano Vizuete, Sergio Montes León, Pablo Torres-Carrion, Benjamin Durakovic, 2025-05-13 This book constitutes the refereed proceedings of the 6th International Conference on Applied Technologies ICAT 2024 held in Samborombón, Ecuador during November 20-22, 2024. The 25 full papers included in this book were carefully reviewed and selected from 95 submissions. They were organized in topical sections as follows: Computing, E-learning, Electronics Technology Trends, Intelligent Systems, Machine Vision, and AT for Engineering Applications. Advances in Electronic Engineering, Communication and Management Vol.1 David Jin, Sally Lin, 2012-01-24 This volume presents the main results of the 2011 International Conference on Electronic Engineering, Communication and Management (EECM2011) held December 24-25, 2011, Beijing, China. The EECM2011 is an integrated conference providing a valuable opportunity for researchers, scholars, and scientists to exchange their ideas face to face together. The main focus of the EECM 2011 and the present 2 volumes, Advances in Electronic Engineering, Communication and Management is on Power Engineering, Electrical engineering applications, Electrical machines, as well as Communication and Information Systems Engineering. **13th International Conference on Electrical Bioimpedance and 8th Conference on Electrical Impedance Tomography 2007** Hermann Scharfetter, Robert Merwa, 2007-10-27 These proceedings continue the series edited in the framework of the traditional triennial International Conference on Electrical Bioimpedance (ICEBI), the most important platform for presenting recent scientific achievements in the area of electrical bioimpedance. The XIII ICEBI was held from August 29 to September 02, 2007, at the Graz University of Technology in Graz, Austria. The organizers received 285 abstracts, 264 of which were accepted for presentation. The authors of these papers came from 34 different nations. Due to the kind support by the International Federation for Biomedical Engineering (IFMBE), the proceedings were published by Springer in the proceedings series of the IFMBE. The editors would like to thank the IFMBE for this kind of service which makes the results of the bioimpedance community visible on a very important publishing platform. According to the quality requirements of the IFMBE, each paper had to pass a thorough two-stage review by two independent members of the scientific board. As a result, 204 papers were selected for being printed in this issue. As already in previous years, the ICEBI was held together with the Conference on Electrical Impedance Tomography, the annual meeting for biomedical impedance imaging. Consequently, the proceedings also contain many contributions from this very important and challenging branch of bioimpedance research. Practical Electronic Design for Experimenters Louis E.
