Adjective Order In English A Semantic Account With Cross:

Postmodifying Attributive Adjectives in English Lars M. Blöhdorn, 2009 This study investigates three different postmodifying adjective constructions in the English language While English adjectives generally precede the entities they modify they may also occur in postmodifying position This study assumes that the different postmodifying constructions are a positional variation of attributive premodification The support for this claim is derived from a detailed analysis of the general syntax and semantics of adjectives as well as a cross check of previous theories with a wide range of actual language examples taken from computerized corpora An approach from the Prague School Functional Sentence Perspective enables this study to accomplish an integrated view of adjectival postmodification

The Oxford Handbook of Word Classes Eva van Lier, 2023 This handbook explores multiple facets of the study of word classes also known as parts of speech or lexical categories The contributions showcase the importance of word classes for the whole discipline of linguistics while also highlighting the many ongoing debates in the areas and outlining fruitful avenues for future research

Linearization in Functional Discourse Grammar Elnora ten Wolde, Riccardo Giomi, Kees Hengeveld, 2025-06-16 This volume develops Functional Discourse Grammar's innovative and unique approach to constituent ordering both by refining some of its theoretical tenets and by applying it to data from a variety of languages including Brazilian Portuguese Dutch English European and South American Spanish Italian Tagalog Tahitian Tamil and Turkish This work will not only interest typologists working on theoretically oriented approaches to constituent order and linguistics working in these individual languages but also given Functional Discourse Grammar's intermediate position between formalist and functionalist models of language linguists working in both types of approaches

means of a theoretical apparatus couched in the framework of Chomsky's generative grammar. The analysis incorporates the following properties of OE adjectives: their inflectional patterning (i.e. whether adjectives take weak and strong inflectional endings); the so-called adjective stacking (i.e. whether adjectives can occur in uninterrupted strings); the surface placement with respect to their complements; the surface placement with respect to the nominal head. The author observes that the differences between prenominal and postnominal adjectives go far beyond the superficial difference in their surface placement. She argues therefore that the two types of adjectives require two different theoretical treatments. The volume consists of five chapters. It is supplemented by four appendices and an extensive bibliography. *Lektos*, 1979
