Baking Technology Breadmaking:

Technology of Breadmaking Stanley P Cauvain,1995 Not another book on breadmaking A forgivable reaction given the length of time over which bread has been made and the number of texts which have been written about the subject To study breadmaking is to realize that like many other food processes it is constantly changing as processing methodologies become increasingly more sophisticated yet at the same time we realize that we are dealing with a food stuff the forms of which are very traditional We can for example look at ancient illustrations of breads in manuscripts and paintings and recognize products which we still make today This contrast of ancient and modern embodied in a single processed foodstuff is part of what makes bread such a unique subject for study We cannot for example say the same for a can of baked beans Another aspect of the uniqueness of breadmaking lies in the requirement for a thorough understanding of the link between raw materials and processing methods in order to make an edible product This is mainly true because of the special properties of wheat proteins aspects of which are explored in most of the chapters of this book Wheat is a product of the natural environment and while breeding and farming practices can modify aspects of wheat quality we millers and bakers still have to respond to the strong influences of the environment

Technology of Breadmaking Stanley P. Cauvain,Linda S. Young,2007-05-20 To study breadmaking is to realize that like many other food processes it is constantly changing as processing methodologies become increasingly more sophisticated yet at the same time we realize that we are dealing with a foodstuff the forms of which are very traditional New ideas and raw materials are constantly being presented to bakers from wheat breeders millers and ingredient and equipment suppliers for their evaluation In addition there are on going changes in legislation and consumer demands To meet such pressures bakers must be able to better integrate their key raw material wheat flour with other ingredients and processing methods to deliver bread of the appropriate quality *Technology of Breadmaking* Second Edition sets out to identify and present the new knowledge that has become available in last 10 years as well as update information Like the first edition it provides a useful tool to help bakers scientists and technologists to cope with those changes

Breadmaking Technology Wulf T. Doerry,1995 **Handbook of Breadmaking Technology** C. A. Stear,2012-12-06

The author's aim in writing this book is to integrate currently available knowledge concerning the basic scientific and technological aspects of breadmaking processes with the diverse breadmaking methods used to manufacture bread in Europe and on the North American continent today To date the main technological advances have been in process mechanization starting with oven development then dough processing or make up equipment followed by continuous and batch mixing techniques from the 1950s to the present time On the engineering side universal emphasis is now being placed on the application of high technology in the form of microprocessors computer controlled equipment and robotization the long term objective being computer integrated manufacture CIM with full automation within the large chain bakery groups in the capitalist countries and the state run collectives of Eastern Europe The application of these key technologies with

biotechnology as yet only applied to a limited degree in food manufacture coupled with advances in biochemical and rheological understanding of dough as a biomass for breadmaking should provide us with more expertise and ability to control the processes with greater efficiency The application of fermentable substrates and industrial enzymes under strict kinetic control should contribute to improving the flavour characteristics of bread Current trends towards improving the nutritional contribution of bread to the daily diet are improving the competitive edge of bread as a basic food in the market place

Baking Technology Wulf Doerry,1995-06-01 *Bread Making* Stanley P. Cauvain,2003-08-31 There has been a wealth of recent research on the complex changes involved in bread making and how they influence the many traits consumers use to define quality Bread making improving quality sums up this key research and what it means for improved process control and a better more consistent product After an introductory review of bread making as a whole part one discusses wheat and flour quality Chapter 3 summarises current research on the structure of wheat providing the context for chapters on wheat proteins chapters 5 and 6 and starch chapter 7 There are also chapters on ways of measuring wheat and flour quality and improving flour for bread making Part two reviews dough formation and its impact on the structure and properties of bread It includes chapters on the molecular structure of dough foam formation and bread aeration together with discussion of the role of key ingredients such as water A final group of chapters then discusses other aspects of quality such as improving taste and nutritional properties as well as preventing moulds and mycotoxin contamination With its distinguished editor and international team of contributors Bread making improving quality is a standard work both for industry and the research community

Technology of Breadmaking Stanley P. Cauvain,Linda S. Young,1998

Technology of Breadmaking Stanley Cauvain,2015-02-17 This practical comprehensive guide illuminates all aspects of breadmaking to give bakers scientists technologists and students a thorough understanding of the many new developments shaping the industry This book bridges the gap between scientific and practical accounts by providing technical coverage of the complex processes that link together to make bread and fermented products Chapters cover the nature of bread products the role of the ingredients in determining their quality processing methods and their control and equipment functions Emphasis is on exploring the contributions of individual components and processing stages to final bread quality reviewing the current state of technical knowledge on breadmaking This third edition reviews the new knowledge which has become available in the last 10 years and considers how the global trends of increased availability and wider range of fermented products around the world impact on current and future technological challenges for bakers Stanley P Cauvain is the Director and Vice President of Research and Development activities at BakeTran and Professor at the International Institute of Agri Food Security Curtin University Perth Western Australia

The Technology of Bread-making William Jago,William C. Jago,1911

Bread-making quality of wheat Bob Belderok,J. Mesdag,Dingena A. Donner,2000-09-30 Wheat is the world's most important agricultural commodity In Europe where wheat is the main staple bread wheat *Triticum aestivum* covers the

majority of land on which wheat is cropped Wheat breeders and technologists have contributed greatly to the continued success of bread wheat and its products The bread making quality of a wheat variety can be described in relation to the processing its kernels must undergo to make a good bread Bread wheat kernels must be suitable for proper milling into a flour that can produce a dough capable of becoming fine bread The type of bread varies depending on local bread making practices Part I of this book contains a study of the anatomy and chemical composition of wheat kernels and of the fundamental difference between soft and hard kernelled varieties It relates these characteristics to the processes of milling dough making and manufacturing of bread and to biscuit and pasta making The genetic basis for these characteristics is illustrated and assay methods for characterizing wheat varieties ranging from Saunders chewing test to the most recent developments in glutenin and gliadin research are evaluated Part II briefly describes country by country how bread making quality has been integrated into wheat breeding programmes throughout Europe and how breeders have attempted to resolve the conflict between yield and quality It describes how quality wheats travelled around the world from their endogenic source in Eastern Europe to North America and back again to Europe This explains how specific genetic material can appear in the pedigrees of varieties grown in a wide range of agro ecological zones In addition to giving an interesting historical survey the book points the way forward for breeders efforts in the future Bread Making Quality updates and interprets knowledge in a way that makes it particularly accessible for food technologists breeders students and teachers

Bread Making Stanley P Cauvain,2003-09-17 Edited by one of the world s leading authorities in the field Bread Making Improving Quality reviews key recent research on the ingredients determining bread characteristics The text discusses what this information means for improved process control and a better more consistent product After an introductory review Part 1 discusses such concepts as the structure and quality of wheat and flour and methods for measuring quality Part 2 covers dough formation and its impact on bread s structure and properties This includes such concepts as foam formation and bread aeration key ingredients improving taste and nutritional properties and the prevention of moulds and mycotoxin contamination
