concrete processes and survey the connections between twenty LST defined subsystems and accounting information systems. Contrary to most modern accounting theory they assert that the monetary scale is a ratio level measurement scale fully analogous to other measurement scales used by science. They reject the idea that the units of the scale are variable and show that this general perception arises from the fallacy of confusing the objects being measured with the units of the measurement scale. Using this scale accounting's unique contribution to information processing is enabling managers and other social deciders to view the diverse matter energy forms of a complex organization as a coherent whole on the attribute specific exchange value. Finally Swanson and Miller analyze generally accepted accounting principles highlighting areas in which the distinction between interpretation and empirical evidence is blurred in practice. They present an extended critique of the usefulness of such principles and propose new alternatives based on living systems theory that will improve both our understanding of accounting methods and measurements and the quality of accounting reporting. Numerous tables and figures enhance the presentation.

Principles of Accounting, with Annual Report, Peachtree Complete Accounting Paul D. Kimmel, Jerry J. Weygandt, Donald E. Kieso, 2004-08-27. This text helps students hit the road with a practical set of tools and the confidence they need to use those tools effectively in making business decisions. The goal is to introduce a new Principles of Accounting text that better reflects a more conceptual and decision making approach to the material. The authors have taken a new macro to micro approach to the Principles of Accounting course by starting with a discussion of real financial statements first rather than starting with the Accounting Cycle although the Accounting Cycle is thoroughly covered in Chapters 3 and 4. The objective is to establish how a financial statement communicates the financing investing and operating activities of a business to users of accounting information. They motivate students by grounding the discussion in the real world showing them the relevance of the topics covered to their future career.
