Grewal, Lawrence R. Weill, Angus P. Andrews, 2001 The only comprehensive guide to Kalman filtering and its applications to real world GPS INS problems Written by recognized authorities in the field this book provides engineers computer scientists and others with a working familiarity with the theory and contemporary applications of Global Positioning Systems GPS Inertial Navigational Systems and Kalman filters Throughout the focus is on solving real world problems with an emphasis on the effective use of state of the art integration techniques for those systems especially the application of Kalman filtering To that end the authors explore the various subtleties common failures and inherent limitations of the theory as it applies to real world situations and provide numerous detailed application examples and practice problems including GPS aided INS modeling of gyros and accelerometers and WAAS and LAAS Drawing upon their many years of experience with GPS INS and the Kalman filter the authors present numerous design and implementation

techniques not found in other professional references including original techniques for Representing the problem in a mathematical model Analyzing the performance of the GPS sensor as a function of model parameters Implementing the mechanization equations in numerically stable algorithms Assessing computation requirements Testing the validity of results Monitoring GPS INS and Kalman filter performance in operation In order to enhance comprehension of the subjects covered the authors have included software in MATLAB demonstrating the workings of the GPS INS and filter algorithms In addition to showing the Kalman filter in action the software also demonstrates various practical aspects of finite word length arithmetic and the need for alternative algorithms to preserve result accuracy An Instructor s Manual presenting detailed solutions to all the problems in the book is available from the Wiley editorial department **AIAA Journal** American Institute of Aeronautics and Astronautics,2000 **International Aerospace Abstracts** ,1997 *Advances and Innovations in Systems, Computing Sciences and Software Engineering* Khaled Elleithy,2007-08-28 *Advances and Innovations in Systems Computing Sciences and Software Engineering* includes a set of rigorously reviewed world class manuscripts addressing and detailing state of the art research projects in the areas of Computing Sciences Software Engineering and Systems *Advances and Innovations in Systems Computing Sciences and Software Engineering* includes selected papers form the conference proceedings of the International Conference on Systems Computing Sciences and Software Engineering SCSS 2006 which was part of the International Joint Conferences on Computer Information and Systems Sciences and Engineering CISSE 2006 All aspects of the conference were managed on line not only the reviewing submissions and registration processes but also the actual conference Conference participants authors presenters and attendees only needed an internet connection and sound available on their computers in order to be able to contribute and participate in this international ground breaking conference The on line structure of this high quality event allowed academic professionals and industry participants to contribute work and attend world class technical presentations based on rigorously refereed submissions live without the need for investing significant travel funds or time out of the office Suffice to say that CISSE received submissions from more than 70 countries for whose researchers this opportunity presented a much more affordable dynamic and well planned event to attend and submit their work to versus a classic on the ground conference The CISSE conference audio room provided superb audio even over low speed internet connections the ability to display PowerPoint presentations and cross platform compatibility the conferencing software runs on Windows Mac and any other operating system that supports Java In addition the conferencing system allowed for an unlimited number of participants which in turn granted CISSE the opportunity to allow all participants to attend all presentations as opposed to limiting the number of available seats for each session
