The global resin market is expected to grow at a CAGR of 6.4%. The growing demand for epoxy resin in the paints and coatings industry is driving the market. In addition, demand is likely to be driven by the growing use of epoxy in the electronics and electrical industries as an insulator and to protect components from dust, short circuiting and moisture. The rising demand for convenience and processed food and beverages is increasing the demand for packaging in both developed and emerging countries. Resins are used in internal coatings of cans to enhance the shelf life of canned food and beverages products. They are also used to protect and preserve the taste, texture and colour of food and beverage products while preventing corrosion. Moreover, the increasing use of glass packaging is significantly contributing to the market growth as it uses resin to prevent corrosion in jars and bottles. The introduction of various stringent policies regarding food safety by several governments is increasing the use of epoxy resin, further fuelling the market growth. Spices and condiments play an important role in the national economies of several spice-producing, importing and exporting countries. India is one of the major spice-producing and exporting countries. Most of the spices and herbs have active principles in them and development of these through pharmacological and preclinical and clinical screening would mean expansion of considerable opportunities for successful commercialization of the product. Spices can be used to create these health-promoting products. The active components in the spices, phthalides, polyacetylenes, phenolic acids, flavanoids, coumarines, triterpenoids, saponins and monoterpenes are powerful tools for promoting physical and emotional wellness. India has been playing a major role in producing and exporting various perennial spices like cardamoms, pepper, vanilla, clove, nutmeg and cinnamon over a wide range of suitable climatic situations. To produce good quality spice products, attention is required not only during cultivation but also at the time of harvesting, processing and
