Operations Management Jay Heizer, Barry Render, 2000-07-01 *Principles of Operations Management* Jay Heizer, 2008 **EBOOK: Operations Management in the Supply Chain: Decisions and Cases** SCHROEDER, 2013-02-16 **EBOOK Operations Management in the Supply Chain Decisions and Cases** *Operations Management in Healthcare* Corinne M. Karuppan, Nancy E. Dunlap, Michael R. Waldrum, 2021-12-07 This thoroughly revised and updated second edition of *Operations Management in Healthcare Strategy and Practice* describes how healthcare organizations can cultivate a competitive lead by developing superior operations using a strategic perspective. In clearly demonstrating the how-tos of effectively managing a healthcare organization, this new edition also addresses the why of providing quality and value-based care. Comprehensive and practice-oriented chapters illustrate how to excel in the four competitive priorities: quality, cost, delivery, and flexibility, in order to build a cumulative model of healthcare operations in which all concepts and tools fit together. This textbook encourages a hands-on approach and integrates mind maps to connect concepts, icons for quick reference, dashboards for measurement and tracking of progress, and newly updated end-of-chapter problems and assignments to reinforce creative and critical thinking. Written with the diverse learning needs in mind for programs in health administration, public health, business administration, public administration, and nursing, the textbook equips students with essential high-level problem-solving and process improvement skills. The book reveals concepts and tools through a series of short vignettes of a fictitious healthcare organization as it embarks on its journey to becoming a highly reliable organization. This second edition also includes a strong emphasis on the patient's perspective, as well as expanded and added coverage of Lean Six Sigma, value-based payment models, vertical integration, mergers and acquisitions, artificial intelligence, population health, and more to reflect evolving innovations in the healthcare environment across the United States. While

human decision making is valued for its adaptability and contextual understanding AI driven systems offer the advantage of faster data driven decisions The concept of hybrid intelligence combines these two poles by utilizing the potential of AI without neglecting the necessary integration of human expertise However a structured method for determining the appropriate degree of automation defining the division of tasks between humans and AI for each decision is still lacking Thus this thesis develops a framework to determine the optimal level of Human AI collaboration for production management use cases This framework enables organizations to leverage AI effectively across various scenarios complementing human expertise to enhance operational efficiency and decision making processes By offering a systematic method the framework helps avoid suboptimal AI ML deployments and supports organizations in harnessing hybrid intelligence for innovative and future ready production management
