**Abstract**—WiFi positioning system has been studying in many fields since the past. Recently, a lot of mobile companies are competing for smartphones. Accordingly, this paper proposes an indoor WiFi positioning system using Android-based smartphones.

**Keywords**—Wi-Fi, Wi-Fi Positioning System, Android, smartphone

## I. INTRODUCTION

Wi-Fi positioning system (WPS) [1] is widely being studied in many fields. WPS usually uses Wi-Fi signals from already-installed private and public WiFi APs in order to provide the location based service (LBS). WPS complements the measurement error of global positioning system (GPS) in the center of the city or indoor.

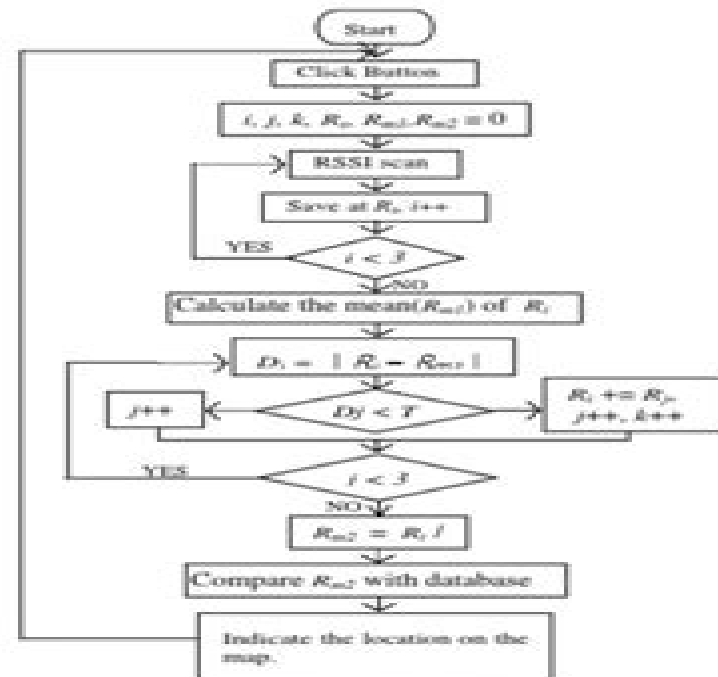

There have been several studies about WPS. RADAR [2] has the position calculation using the WiFi signal strength and has an average of three meters error on the coordinate of two dimensions. In another WPS [3], KF (Kalman Filter) stabilizes Wi-Fi signals and is used to calculate the position. In [4], a method to calculate the position by combining Wi-Fi with the GPS is proposed. However, the Wi-Fi signals provide a low precision for tracking the locations. Therefore, in order to acquire more accurate location of a target, Wi-Fi APs dedicated for localization should be installed in the target area.

In this paper, we propose a personal indoor/outdoor WPS system on the smartphone using RSS (Received Signal Strength) of signals from dense Wi-Fi access points dedicated for localization. In Section 2, the proposed algorithm for tracking the position is presented. In Section 3, the implementation of the algorithm and the results of experiments are described. In section 4, we conclude the paper.

## II. POSITIONING ALGORITHM

RSS from each AP is measured three times and the mean value of three RSSs is calculated. We use the difference between the mean value and each training value. If the difference is below a threshold (T), the training value is withdrawn and then the mean of filtered training values is calculated again. Finally, the mean value is compared with the value of database and a proper location on the map is found.

Figure 1 shows the flow chart of the proposed algorithm. We decided a threshold that gives the lowest error rate through experiment.

$R_m$  : The mean of  $R_i$                        $R_k$  : Sum of available data  $R_j$   
 $R_{m1}$  : The mean of available data  $R_j$                        $i, j$  : The number of iterations  
 $D$  : Difference between  $R_j$  and  $R_{m1}$                        $T$  : Threshold of difference  
 $k$  : The number of available data  $R_j$                        $R$  : Training values of RSS

Figure 1. Flow chart of positioning algorithm.

**Advances in AI for Biomedical Instrumentation, Electronics and Computing** Vibhav Sachan, Shahid Malik, Ruchita Gautam, Parvin Kumar, 2024-06-13 This book contains the proceedings of 5th International Conference on Advances in AI for Biomedical Instrumentation Electronics and Computing ICABEC 2023 which provided an international forum for the exchange of ideas among researchers students academicians and practitioners It presents original research papers on subjects of AI Biomedical Communications Computing Systems Some interesting topics it covers are enhancing air quality prediction using machine learning optimization of leakage power consumption using hybrid techniques multi robot path planning in complex industrial dynamic environment enhancing prediction accuracy of earthquake using machine learning algorithms and advanced machine learning models for accurate cancer diagnostics Containing work presented by a diverse range of researchers this book will be of interest to students and researchers in the fields of Electronics and Communication Engineering Computer Science Engineering Information Technology Electrical Engineering Electronics and Instrumentation Engineering Computer applications and all interdisciplinary streams of Engineering Sciences *Progress in Applied Sciences, Engineering and Technology* Pei Long Xu, Hong Zong Si, Yi Qian Wang, Pin Wang, 2014-05-23 Selected peer reviewed papers from the 2014 International Conference on Materials Science and Computational Engineering ICMSCE 2014 May 20 21 2014 Qingdao China **Smartphone-based Indoor Positioning Using Wi-Fi, Inertial Sensors and Bluetooth** Viet-Cuong Ta, 2017 With the popularity of smartphones and tablets in daily life the task of finding user's position through their phone gains much attention from both the research and industry communities Technologies integrated in smartphones such as GPS Wi-Fi Bluetooth and camera are all capable for building a positioning system Among those technologies GPS has approaches have become a standard and achieved much success for the outdoor environment Meanwhile Wi-Fi inertial sensors and Bluetooth are more preferred for positioning task in indoor environment For

smartphone positioning Wi-Fi fingerprinting based approaches are well established within the field. Generally speaking, the approaches attempt to learn the mapping function from Wi-Fi signal characteristics to the real-world position. They usually require a good amount of data for finding a good mapping. When the available training data is limited, the fingerprinting-based approach has high errors and becomes less stable. In our works, we want to explore different approaches of Wi-Fi fingerprinting methods for dealing with a lacking in training data. Based on the performance of the individual approaches, several ensemble strategies are proposed to improve the overall positioning performance. All the proposed methods are tested against a published dataset which is used as the competition data of the IPIN 2016 Conference with offsite track track 3. Besides the positioning system based on Wi-Fi technology, the smartphone's inertial sensors are also useful for the tracking task. The three types of sensors, which are accelerometer, gyroscope, and magnetic, can be employed to create a Step And Heading (SHS) system. Several methods are tested in our approaches. The number of steps and user's moving distance are calculated from the accelerometer data. The user's heading is calculated from the three types of data with three methods, including rotation matrix, Complimentary Filter, and Madgwick Filter. It is reasonable to combine SHS outputs with the outputs from Wi-Fi, due to both technologies are present in the smartphone. Two combination approaches are tested. The first approach is to use directly the Wi-Fi outputs as pivot points for fixing the SHS tracking part. In the second approach, we rely on the Wi-Fi signal to build an observation model, which is then integrated into the particle filter approximation step. The combining paths have a significant improvement from the SHS tracking only and the Wi-Fi only. Although SHS tracking with Wi-Fi fingerprinting improvement achieves promising results, it has a number of limitations, such as requiring additional sensors, calibration efforts, and restriction on smartphone handling positions. In the context of multiple users, Bluetooth technology on the smartphone could provide the approximated distance between users. The relative distance is calculated from the Bluetooth inquiry process. It is then used to improve the output from Wi-Fi positioning models. We study two different combination methods. The first method aims to build an error function, which is possible to model the noise in the Wi-Fi output and Bluetooth approximated distance for each specific time interval. It ignores the temporal relationship between successive Wi-Fi outputs. Position adjustments are then computed by minimizing the error function. The second method considers the temporal relationship and the movement constraint when the user moves around the area. The tracking step are carried out by using particle filter. The observation model of the particle filter are a combination between the Wi-Fi data and Bluetooth data. Both approaches are tested against real data, which include up to four different users moving in an office environment. While the first approach is only applicable in some specific scenarios, the second approach has a significant improvement from the position output based on Wi-Fi fingerprinting model only.

*A Cost-effective Wi-fi Based Indoor Positioning System for Mobile Phones* Richard J. Wandell, 2018. Fingerprinting based Indoor Positioning Systems require a significant amount of time to set up due to the need for signal map creation. We propose a Wi-Fi based mobile phone Indoor Positioning System.

that can be set up in a short amount of time in any environment with existing Wi-Fi infrastructure. We introduce interpolation into a fingerprinting-based system to reduce the number of reference points needed, leading to a reduction in signal map creation time. The proposed interpolation method is used in conjunction with a particle filter algorithm to provide an accuracy level comparable to the current state of the art. We create signal maps at three separate locations using a 100%, 50%, 20%, and 10% scan in order to evaluate the effectiveness of our interpolation on the localization error on a lower scan percentage. We evaluated our signal maps before and after interpolation using 16 tests which include both walking and stationary tests as well as tests taken two and three weeks after the initial data gathering. We show that interpolation is able to reduce the effects of a dimensional mismatch between signal map reference point vectors and a test sample vector as well as reduce the effects of signal map aging.

**CompTIA Security+ All-in-One Exam Guide, Fourth Edition (Exam SY0-401)** Wm. Arthur Conklin, Greg White, Dwayne Williams, Chuck Cothren, Roger L.

Davis, 2014-12-16. Get complete coverage of all objectives included on the latest release of the CompTIA Security exam from this comprehensive resource. Cowritten by leading information security experts, this authoritative guide fully addresses the skills required for securing a network and managing risk. You'll find learning objectives at the beginning of each chapter, exam tips, practice exam questions, and in-depth explanations. Designed to help you pass the CompTIA Security exam SY0-401, this definitive volume also serves as an essential on-the-job reference. **COVERS ALL EXAM DOMAINS INCLUDING** Network security, Compliance and operational security, Threats and vulnerabilities, Application data and host security, Access control and identity management, Cryptography. **ELECTRONIC CONTENT INCLUDES** 200 practice exam questions, Test engine that provides practice exams or quizzes that can be customized by chapter or exam objective.

**A 3D Ubiquitous Multi-Platform Localization and Tracking System for Smartphone** Seyyed Mahmood Jafari Sadeghi, 2017. We have designed and implemented an indoor/outdoor localization system utilizing several sources of information to provide the accurate location of a smartphone/tablet both indoors and outdoors. In this system, we merge the traditional indoor localization techniques based on Wi-Fi fingerprinting with the recent methods which are mostly based on Bluetooth Low Energy (BLE) beacons to acquire a higher accuracy of positioning and also support a wider range of smartphones such as Android and iOS devices. A new format for the advertisement packets of BLE beacons was proposed which embeds all parameters of the beacon including its location. Also, a transparent scheme is proposed and implemented which combines indoor localization techniques with Global Positioning System (GPS) to increase the accuracy of the indoor localization and also provides us with a soft switching between the GPS and indoor positioning. We have shown that using a Medium Access Control (MAC) filtering method, we can reduce the size of Wi-Fi radiomap for fingerprinting techniques and hence reduce their complexity and run time. The problem of tracking and floor detection is also investigated, and promising results are achieved.

by using the sensors such as barometer and gyroscope We have also addressed the problem of large scale indoor positioning in which we have the fingerprinting database for thousands of buildings worldwide Efficient algorithms have been proposed to reduce the complexity and the management overhead of the Wi Fi fingerprints A cooperative method was proposed that allows iOS devices through BLE packets broadcast by Android phones tablets to localize themselves using Wi Fi fingerprints inside a building Finally a sensor transmission system for Android devices was built which allows us to simulate our algorithms in real time using real world data on a PC running Matlab software

### **Indoor Wifi Positioning System For Android Based Smartphone Introduction**

In the digital age, access to information has become easier than ever before. The ability to download Indoor Wifi Positioning System For Android Based Smartphone has revolutionized the way we consume written content. Whether you are a student looking for course material, an avid reader searching for your next favorite book, or a professional seeking research papers, the option to download Indoor Wifi Positioning System For Android Based Smartphone has opened up a world of possibilities. Downloading Indoor Wifi Positioning System For Android Based Smartphone provides numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying, researching, and reading on the go. Moreover, the cost-effective nature of downloading Indoor Wifi Positioning System For Android Based Smartphone has democratized knowledge. Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are numerous websites and platforms where individuals can download Indoor Wifi Positioning System For Android Based Smartphone. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading Indoor Wifi Positioning System For Android Based Smartphone. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical downloading, it is advisable to utilize reputable websites that prioritize the legal distribution of content. When downloading Indoor Wifi Positioning System For Android Based

Smartphone, users should also consider the potential security risks associated with online platforms. Malicious actors may exploit vulnerabilities in unprotected websites to distribute malware or steal personal information. To protect themselves, individuals should ensure their devices have reliable antivirus software installed and validate the legitimacy of the websites they are downloading from. In conclusion, the ability to download Indoor Wifi Positioning System For Android Based Smartphone has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it offers, free PDF downloads have become a popular choice for students, researchers, and book lovers worldwide. However, it is crucial to engage in ethical downloading practices and prioritize personal security when utilizing online platforms. By doing so, individuals can make the most of the vast array of free PDF resources available and embark on a journey of continuous learning and intellectual growth.

### **FAQs About Indoor Wifi Positioning System For Android Based Smartphone Books**

How do I know which eBook platform is the best for me? Finding the best eBook platform depends on your reading preferences and device compatibility. Research different platforms, read user reviews, and explore their features before making a choice. Are free eBooks of good quality? Yes, many reputable platforms offer high-quality free eBooks, including classics and public domain works. However, make sure to verify the source to ensure the eBook credibility. Can I read eBooks without an eReader? Absolutely! Most eBook platforms offer webbased readers or mobile apps that allow you to read eBooks on your computer, tablet, or smartphone. How do I avoid digital eye strain while reading eBooks? To prevent digital eye strain, take regular breaks, adjust the font size and background color, and ensure proper lighting while reading eBooks. What the advantage of interactive eBooks? Interactive eBooks incorporate multimedia elements, quizzes, and activities, enhancing the reader engagement and providing a more immersive learning experience. Indoor Wifi Positioning System For Android Based Smartphone is one of the best book in our library for free trial. We provide copy of Indoor Wifi Positioning System For Android Based Smartphone in digital format, so the resources that you find are reliable. There are also many Ebooks of related with Indoor Wifi Positioning System For Android Based Smartphone. Where to download Indoor Wifi Positioning System For Android Based Smartphone online for free? Are you looking for Indoor Wifi Positioning System For Android Based Smartphone PDF? This is definitely going to save you time and cash in something you should think about. If you trying to find then search around for online. Without a doubt there are numerous these available and many of them have the freedom. However without doubt you receive whatever you purchase. An alternate way to get ideas is always to check another Indoor Wifi Positioning System For Android Based Smartphone. This method for see exactly what may be included and adopt these ideas to your book. This site will almost certainly help you save time and effort, money and stress. If you are

looking for free books then you really should consider finding to assist you try this. Several of Indoor Wifi Positioning System For Android Based Smartphone are for sale to free while some are payable. If you arent sure if the books you would like to download works with for usage along with your computer, it is possible to download free trials. The free guides make it easy for someone to free access online library for download books to your device. You can get free download on free trial for lots of books categories. Our library is the biggest of these that have literally hundreds of thousands of different products categories represented. You will also see that there are specific sites catered to different product types or categories, brands or niches related with Indoor Wifi Positioning System For Android Based Smartphone. So depending on what exactly you are searching, you will be able to choose e books to suit your own need. Need to access completely for Campbell Biology Seventh Edition book? Access Ebook without any digging. And by having access to our ebook online or by storing it on your computer, you have convenient answers with Indoor Wifi Positioning System For Android Based Smartphone To get started finding Indoor Wifi Positioning System For Android Based Smartphone, you are right to find our website which has a comprehensive collection of books online. Our library is the biggest of these that have literally hundreds of thousands of different products represented. You will also see that there are specific sites catered to different categories or niches related with Indoor Wifi Positioning System For Android Based Smartphone So depending on what exactly you are searching, you will be able to choose ebook to suit your own need. Thank you for reading Indoor Wifi Positioning System For Android Based Smartphone. Maybe you have knowledge that, people have search numerous times for their favorite readings like this Indoor Wifi Positioning System For Android Based Smartphone, but end up in harmful downloads. Rather than reading a good book with a cup of coffee in the afternoon, instead they juggled with some harmful bugs inside their laptop. Indoor Wifi Positioning System For Android Based Smartphone is available in our book collection an online access to it is set as public so you can download it instantly. Our digital library spans in multiple locations, allowing you to get the most less latency time to download any of our books like this one. Merely said, Indoor Wifi Positioning System For Android Based Smartphone is universally compatible with any devices to read.
