**Intelligent Decision Making in Quality Management** Cengiz Kahraman, Seda Yanik, 2015-10-31 This book presents recently developed intelligent techniques with applications and theory in the area of quality management The involved applications of intelligence include techniques such as fuzzy sets neural networks genetic algorithms etc The book consists of classical quality management topics dealing with intelligent techniques for solving the complex quality management problems The book will serve as an excellent reference for quality managers researchers lecturers and postgraduate students in this area The authors of the chapters are well known researchers in the area of quality management *Innovative Solutions For Next-Generation Fertilizers* Mohamed Ait-El-Mokhtar, Marouane Baslam, Raffaella Maria Balestrini, 2025-10-24 The field of agricultural science is currently grappling with the challenge of feeding a projected global population of 10 billion people by 2050 This task is compounded by the anticipated decline in productivity of two thirds of worldwide

agricultural land due to climate change and the intensification of agriculture which has led to soil degradation and reduced fertility Current agricultural practices heavily rely on fertilizers to boost crop productivity but improper application can result in significant economic environmental and social issues including nutrient runoff and increased greenhouse gas emissions Recent studies have highlighted the need for sustainable intensification of agriculture emphasizing the importance of developing next generation fertilizers that are both efficient and environmentally friendly Despite advancements there remains a critical gap in understanding and implementing innovative fertilizer technologies that can sustainably enhance crop yields This research topic aims to explore and develop new and sustainable technologies for next generation fertilizers that can improve crop nutrition efficiency increase yields and promote sustainable agriculture while minimizing environmental impacts The primary objectives include investigating innovative approaches to fertilizer production understanding the molecular mechanisms of action and evaluating the potential of these new technologies to replace conventional fertilizers Key questions to be addressed include how these novel fertilizers can enhance nutrient use efficiency promote crop tolerance to various stresses and improve the nutritional quality of crops To gather further insights into the boundaries of next generation fertilizers we welcome articles addressing but not limited to the following themes Innovative approaches and advanced methods to produce and characterize next generation fertilizers e g rhizosphere microbiome engineering atmospheric nitrogen fixation enhanced efficiency fertilizers biodegradable coatings for controlled release Systems of bioactive based novel fertilizers including biostimulants nutrients signaling molecules and in organic molecules Development of next generation fertilizers for enhanced nutrient use efficiency NUE in crops Promoting crop tolerance to biotic and abiotic stresses using new fertilizers Synergies between the bioactivities of different fertilizers Improving crop nutritional quality and functionality using next generation fertilizers Understanding the molecular mechanisms of novel fertilizers in imparting stress tolerance and NUE in crops

Levy,Stanley Lemeshow,2009-01-27 A trusted classic on the key methods in population sampling now in a modernized and expanded new edition Sampling of Populations Fourth Edition continues to serve as an all inclusive resource on the basic and most current practices in population sampling Maintaining the clear and accessible style of the previous edition this book outlines the essential statistical methods for survey design and analysis while also exploring techniques that have developed over the past decade The Fourth Edition successfully guides the reader through the basic concepts and procedures that accompany real world sample surveys such as sampling designs problems of missing data statistical analysis of multistage sampling data and nonresponse and poststratification adjustment procedures

Rather than employ a heavily mathematical approach the authors present illustrative examples that demonstrate the rationale behind common steps in the sampling process from creating effective surveys to analyzing collected data Along with established methods modern topics are treated through the book s new features which include A new chapter on telephone sampling with coverage of declining response rates the creation of do not call lists and the growing use of cellular phones A new chapter on sample weighting that focuses on adjustments to weight for nonresponse frame deficiencies and the effects of estimator instability An updated discussion of sample survey data analysis that includes analytic procedures for estimation and hypothesis testing A new section on Chromy s widely used method of taking probability proportional to size samples with minimum replacement of primary sampling units An expanded index with references on the latest research in the field All of the book s examples and exercises can be easily worked out using various software packages including SAS STATA and SUDAAN and an extensive FTP site contains additional data sets With its comprehensive presentation and wealth of relevant examples *Sampling of Populations Fourth Edition* is an ideal book for courses on survey sampling at the upper undergraduate and graduate levels It is also a valuable reference for practicing statisticians who would like to refresh their knowledge of sampling techniques
