Overheated Kate Aronoff, 2021-04-20 This damning account of the forces that have hijacked progress on climate change shares a bold vision of what it will take politically and economically to face the existential threat of global warming head on In the past few years it has become impossible for most to deny the effects of climate change and that the planet is warming and to acknowledge that we must act But a new kind of denialism is taking root in the halls of power shaped by a quarter century of neoliberal policies that threatens to doom us before we've grasped the full extent of the crisis As Kate Aronoff argues since the 1980s and 1990s economists pro business Democrats and Republicans in the US and global organizations like the UN and the World Economic Forum have all made concessions to the oil and gas industry that they have no intention of reversing What's more they believe that climate change can be solved through the market capitalism can be a force for good and all of us corporations included are fighting the good fight together These assumptions Aronoff makes abundantly clear will not save the planet Drawing on years of reporting and rigorous economic analysis Aronoff lays out a robust vision for what will detailing how to constrain the fossil fuel industry transform the economy into a sustainable democratic one mobilize political support create effective public private partnerships enact climate reparations and adapt to inevitable warming in a way that is just and equitable Our future *Overheated* makes clear will require a radical reimagining of our politics and our economies but if done right it will save the world
