*Torture and Democracy* Darius Rejali, 2009-06-08 This is the most comprehensive and most comprehensively chilling study of modern torture yet written Darius Rejali one of the world's leading experts on torture takes the reader from the late nineteenth century to the aftermath of Abu Ghraib from slavery and the electric chair to electro-torture in American inner cities and from French and British colonial prison cells and the Spanish American War to the fields of Vietnam the wars of the Middle East and the new democracies of Latin America and Europe As Rejali traces the development and application of one torture technique after another in these settings he reaches startling conclusions As the twentieth century progressed he argues democracies not only tortured but set the international pace for torture Dictatorships may have tortured more and more indiscriminately but the United States Britain and France pioneered and exported techniques that have become the lingua franca of modern torture methods that leave no marks Under the watchful eyes of reporters and human rights activists low level authorities in the world's oldest democracies were the first to learn that to scar a victim was to advertise iniquity and invite scandal Long before the CIA even existed police and soldiers turned instead to clean techniques such as torture by electricity ice water noise drugs and stress positions As democracy and human rights spread after World War II so too did these methods Rejali makes this troubling case in fluid arresting prose and on the

basis of unprecedented research conducted in multiple languages and on several continents begun years before most of us had ever heard of Osama bin Laden or Abu Ghraib The author of a major study of Iranian torture Rejali also tackles the controversial question of whether torture really works answering the new apologists for torture point by point A brave and disturbing book this is the benchmark against which all future studies of modern torture will be measured *Braiding Fine Leather* David W. Morgan,2002 Designed to help the beginning leather braider acquire basic skills in a straightforward manner this book shows readers how to braid simple projects fairly quickly With close attention to detail and a little practice using the methods described here novices can produce attractive and enduring items from either precut lace or from a skin or side of leather Leather braiding was developed in Australia in whipmaking shops The craft had been carried to Australia by thongmakers from England who were familiar with the thongs used on finely braided carriage whips Kangaroo leather one of the finest leathers available for braiding provided the material for high quality work and a large and discriminating market in Australia led to improvements in techniques Using these highly refined techniques and providing complete instructions and clear closeup photographs showing each step in the process David Morgan has created an excellent book for those who want to learn to braid leather A metallurgical engineer by training and occupation in the 1960s Morgan became interested in Australian braided work made from kangaroo hide With his wife he set up a part time mail order business selling a variety of Australian imports In the 1980s he made the whips for the Indiana Jones movies and he has been making them ever since By 1990 he had abandoned metallurgy to run the mail order business full time He is now following an interest in the historical aspects of cattle working whips Wheelers co nz **Whipmaking book 1, Basic stockwhips , The Country Gentlemen's Catalogue of Requisites for the House, Field, Farm, Garden, Stable, Kennel, &c., to which is Added a Note Book, Prize Record and Directory, Specially Compiled for the Use of Country Gentlemen ,1894 Saddlery and Harness ,1892 *They Saddled the West* Lee M.
