The nurse is educating a parent regarding child safety for the 14-month-old toddler. What would the nurse include in the educational plan?

You Selected:

- Utilize a front-facing car seat with appropriate harness straps until at least the age of 24 months.

Correct response:

- Maintain supervision when the child is near stoves, ovens, irons and other hot items the child could reach.

**Explanation:**

Toddlers are more mobile and curious, leading to accidental burns on stoves, ovens, irons etc. They must be supervised when near these objects to avoid burns. If firearms are in the home, they should be unloaded and locked in a secure location. Educating the toddler about firearm safety will not be remembered and is appropriate for a much older child. Buckets are a danger to toddlers (who are top heavy) if they have water in them and could result in a drowning. Empty buckets are not a drowning concern. Children are to be placed in a rear-facing car seat until 2 years of age, not a front-facing one.
