**DIGITALIZATION, METAVERSE, ARTIFICIAL INTELLIGENCE IN THE CONTEXT OF HUMAN AND INDIVIDUAL RIGHTS PROTECTION IN UKRAINE AND THE WORLD** Kostenko Oleksii, Kharytonova Olena, Kharytonov Yevhen, 2025-06-23 This monograph examines the legal issues related to the dynamics of Ukraine s digital transformation focusing on the intersection of artificial intelligence the metaverse and the protection of human rights in general and individual rights in particular in Ukraine and the world The monograph offers a comprehensive legal analysis of the categories and phenomena of global digitalization such as the metaverse the artificial Internet digital rights digital identity etc The key topics include understanding artificial intelligence as a legal concept studying the problems of its legal personality and responsibility and establishing its significance and role in the context of hybrid warfare In addition the study analyzes the potential of artificial intelligence technologies in the economic and industrial revival of Ukraine the possibilities and legal problems of their use in legal including notary practice in the field of medicine and pharmacy in education and the corporate sector It also explores the current problems of using blockchain technology and artificial intelligence in the management of intellectual property rights This emphasizes the need for interdisciplinary cooperation to address the challenges of protecting sensitive data and innovation while promoting a sustainable balance between innovation and social

well being This work contributes to the ongoing discourse on the role of digital technologies in shaping future societies by offering a unique perspective on their application and governance on Ukraine s path to a digital society *InfoWorld*,1998-11-09 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects *A Socio-Legal Theory of Money for the Digital Commercial Society* Israel Cedillo Lazcano,2024-02-22 This book poses the question do we need a new body of regulations and the constitution of new regulatory agents to face the evolution of money in the Fourth Industrial Revolution After the Global Financial Crisis and the subsequent introduction of Distributed Ledger Technologies in monetary matters multiple opinions claim that we are in the middle of a financial revolution that will eliminate the need for central banks and other financial institutions to form bonds of trust on our behalf In contrast to these arguments this book argues that we are not witnessing a revolutionary expression but an evolutionary one that we can trace back to the very origin of money Accordingly the book provides academics regulators and policy makers with a multidisciplinary analysis that includes elements such as the relevance of intellectual property rights which are disregarded in the legal analysis of money Furthermore the book proposes the idea that traditional analyses on the exercise of the *lex monetae* ignore the role of inside monies and technological infrastructures developed and supported by the private sector as exemplified in the evolution of the cryptoassets market and in cases such as *Banco de Portugal v Waterlow Sons* The book puts forward a proposal for the design and regulation of new payment systems and invites the reader to look beyond the dissemination of individual Distributed Ledger Technologies such as Bitcoin

**Regulating the Crypto Economy** Iris H-Y Chiu,2021-10-21 This book focuses on the building of a crypto economy as an alternative economic space and discusses how the crypto economy should be governed The crypto economy is examined in its productive and financialised aspects in order to distil the need for governance in this economic space The author argues that it is imperative for regulatory policy to develop the economic governance of the blockchain based business model in order to facilitate economic mobilisation and wealth creation The regulatory framework should cater for a new and unique enterprise organisational law and the fund raising and financing of blockchain based development projects Such a regulatory framework is crucially enabling in nature and consistent with the tenets of regulatory capitalism Further the book acknowledges the rising importance of private monetary orders in the crypto economy and native payment systems that do not rely on conventional institutions for value transfer A regulatory blueprint is proposed for governing such monetary orders as commons governance The rise of Decentralised Finance and other financial innovations in the crypto economy are also discussed and the book suggests a framework for regulatory consideration in this dynamic landscape in order to meet a balance of public interest objectives and private interests By setting out a reform agenda in relation to economic and financial governance in the crypto economy this forward looking work argues for the extension of regulatory capitalism to this perceived wild west of an alternative economic space It advances the message that an innovative regulatory

agenda is needed to account for the economically disruptive and technologically transformative developments brought about by the crypto economy
