**Head First HTML5 Programming** Eric Freeman, Elisabeth Robson, 2011-10-06. HTML has been on a wild ride. Sure, HTML started as a mere markup language, but more recently HTML's put on some major muscle. Now we've got a language tuned for building web applications with Web storage, 2D drawing, offline support, sockets, and threads, and more. And to speak this language, you've got to go beyond HTML5 markup and into the world of the DOM, events, and JavaScript APIs. Now you probably already know all about HTML markup, otherwise known as structure, and you know all about CSS style presentation, but what you've been missing is JavaScript behavior. If all you know about are structure and presentation, you can create some great-looking pages, but they're still just pages. When you add behavior with JavaScript, you can create an interactive experience; even better, you can create full-blown web applications. *Head First HTML5 Programming* is your ultimate tour guide to creating web applications with HTML5 and JavaScript, and we give you everything you need to know to build them, including how to add interactivity to your pages, how to communicate with the world of Web services, and
