

# OpenWrt Development Guide

This document describes the development process for OpenWrt. It covers the build system, the package management system, and the various tools and utilities used in the development process.

## OpenWrt Development Environment

OpenWrt development is done in a collection of tools and utilities. The development environment consists of a Linux host, a build system, a package management system, and a set of tools and utilities. The build system is responsible for building the OpenWrt binaries. The package management system is responsible for managing the OpenWrt packages. The tools and utilities are used for various tasks such as testing, debugging, and documentation.

Figure 1: OpenWrt development structure. The structure is shown in the context of the OpenWrt development environment.
