Mathematical Studies for the IB Diploma Ric Pimentel, Terry Wall, 2010-01-01 Mathematical Studies has been written specially for students following the International Baccalaureate IB Diploma. Each topic opens with the syllabus content and exactly follows the syllabus order covering the latest syllabus requirements in full. This is invaluable in helping teachers to plot a way through the course and for students when the time comes for revision. A unique feature of the book is the inclusion of step by step instructions on the use of the graphic display calculator. The text also makes reference to Autograph and Geogebra software. Each topic has clear explanations, worked examples and plenty of practice exercises to reinforce learning. The Student Assessments at the end of each topic can be used as homework or to test learning. The CD ROM contains powerpoints, spreadsheets, Geogebra files, step by step audio visual explanations of the harder concepts and extra questions. Students who are taking this course have a variety of backgrounds and widely differing levels of previous mathematical knowledge. The Presumed Knowledge Assessments identify areas of weakness so that teachers can address these before tackling each topic. Mathematics has a rich historical and multi cultural background and the book is littered with such references. There are ideas for project work in each topic. Internal assessment of the project is a key part of assessment. Links to Theory of Knowledge offer opportunities for cross curriculum study. Follows IB Diploma terminology and notation with a full glossary included. The use of the Graphic Display Calculator is clearly taught in every topic. The accompanying CD ROM provides essential revision as well as activities for extended study. The authors Ric Pimentel and Terry Wall are experienced teachers and examiners of Mathematics at this level.
