Climate Change and Carbon Markets: Late or Too Late? John Ure, 2026-01-01 This book offers an accessible introduction to climate change science and a comprehensive description and assessment of market and financial tools to combat the effects of climate change The opening three chapters focus upon science Chapter One is devoted to understanding the basics of climatology and the scenarios forecast by scientists contributing to the UN s Framework Convention on Climate Change UNFCCC Chapter Two focuses upon the alternative pathways to meeting the Paris Agreement goals as discerned by the over 700 scientists contributing to the Intergovernmental Panel on Climate Change IPCC Chapter 3 is a highly critical analysis of how different schools of economists have used a damage function to estimate the long term costs of climate change and more recent attempts to recognise the value of nature as an environmental benefit for future generations Chapters 4 6 examine policies to combat climate change Chapter 4 looks in some depth at public policies adopted by leading economies covering China the EU India Singapore the UK and the USA The role of a carbon tax and alternatives are examined Chapter 5 is devoted to a history and analysis of the voluntary carbon market VCM sector and the role of carbon credits It not only highlights the weaknesses but examines the possibility that public sector regulation could be used to increase the credibility of voluntary carbon market transactions The chapter also examines the available technologies for carbon dioxide removal Chapter 6 is devoted to green finance and provides a critical review of the UN model that relies upon public capital catalysing private investment in green projects a model that is failing the Global South where the majority of Green House Gases GHG actually arise Globally there is an annual green finance gap of over USD1 trillion Chapter 7 concludes with an assessment of where present policies fall short notwithstanding the withdrawal of the USA for the Paris Agreement and in particular places emphasis on the need to combat GHG emissions where they most frequently occur in the Global South The author calls for the creation of an International Green Bank issuing green bonds supported by the world s leading economies with China and India playing leading roles and with an exclusive focus on emerging market and developing economies EMDEs before it is too late

The Remaking of Social Contracts Gita Sen, Marina Durano, 2014-09-11 Development Alternatives with Women for a New Era DAWN argues that social contracts must be recreated if they are to fulfil the promise of human rights In The Remaking of Social Contracts leading thinkers and activists address a wide range of concerns global economic governance militarism ecological tipping points the nation state movement building sexuality and reproduction and religious fundamentalism These themes are of wide ranging importance for the survival and well being of us all and reflect the many dimensions and inter connectedness of our lives Using feminist lenses the book puts forward a holistic and radical understanding of the synergies tensions and contradictions between social movements and global regional and local power structures and processes and it points to other alternatives and possibilities for this fierce new world

The Changing Nature of Religious Rights under International Law Malcolm Evans, Peter Petkoff, Julian Rivers, 2015-03-19 The Declaration on the Elimination of All

Forms of Intolerance and of Discrimination Based on Religion or Belief as proclaimed by the United Nations General Assembly in 1981 is the only universal human rights instrument specifically focusing on religious intolerance and discrimination. However, recent years have seen increasing controversy surrounding this right in both political and legal contexts. The European Court of Human Rights has experienced a vast expansion in the number of cases it has had brought before it concerning religious freedom and politically the boundaries of the right have been much disputed. This book provides a systematic analysis of the different approaches to religious rights which exist in public international law. The book explores how particular institutional perspectives emerge in the context of these differing approaches. It examines and challenges these institutional perspectives. It identifies new directions for approaching religious rights through international law by examining existing legal tools and assesses their achievements and shortcomings. It studies religious organisations support for international human rights protection as well as religious critique of international human rights and the development of an alternative religious Bills of Rights. It investigates whether expressions of members belonging to religious minorities can be considered under the minority right to culture rather than the right to religion and discusses the benefits and shortcomings of such a route. It analyses the reach and limits of the provisions in the 1981 Declaration, identifies ways in which the right is being eroded as a concept and suggests new ways in which the right can be reinforced and protected.

Many Layers of Ecocentrism Abhik Gupta, 2024-06-17. This book unveils the myriad streams of ecocentric thoughts that have been flowing through the human mind in indigenous communities in the wisdom of philosophers in the creative expressions of poets and writers, sometimes latent but sometimes more explicit. The strength of this book lies in the fact that it attempts to show that ecocentrism had not emerged suddenly as a distinct line of philosophical thought or found its place among the various normative approaches toward nature but the seeds of ecocentrism had always been running through human societies. Thus, this book not only emphasizes the unity of life but also reveals the inherent unity of all hues of ecocentrism. The book adopts a multidisciplinary approach which is essential to dwell on a topic like ecocentrism which permeates the domains of disciplines as disparate as science, philosophy, religion, normative ethics, myths, and folklore, poetry, and literature among others. Despite this eclectic approach, the book attempts to maintain continuity among the chapters and present these concepts in a simple form that will be easily accessible by readers from all conceivable backgrounds. This book would be useful to the students, researchers, and faculty from the fields of ecology and environmental science, philosophy, sociology, religious studies, and literature. It will also be an indispensable companion for all nature lovers, activists, and general readers interested in the emergence and evolution of environmental thoughts.

UNEP Year Book, 2011. Overview of major global and regional environmental issues and development that shaped policy decisions and actions during the course of the year.
