Modeling Random Processes for Engineers and Managers James J. Solberg, 2008-12-22 Modeling Random Processes for Engineers and Managers provides students with a gentle introduction to stochastic processes emphasizing full explanations and many examples rather than formal mathematical theorems and proofs The text offers an accessible entry into a very useful and versatile set of tools for dealing with uncertainty and variation Many practical examples of models as well as complete explanations of the thought process required to create them motivate the presentation of the computational methods In addition the text contains a previously unpublished computational approach to solving many of the equations that occur in Markov processes Modeling Random Processes is intended to serve as an introduction but more advanced students can use the case studies and problems to expand their understanding of practical uses of the theory

Maximum-Entropy and Bayesian Methods in Science and Engineering G. Erickson, C.R. Smith, 1988-08-31 This volume has its origin in the Fifth Sixth and Seventh

Workshops on Maximum Entropy and Bayesian Methods in Applied Statistics held at the University of Wyoming August 5 8 1985 and at Seattle University August 5 8 1986 and August 4 7 1987 It was anticipated that the proceedings of these workshops would be combined so most of the papers were not collected until after the seventh workshop Because most of the papers in this volume are in the nature of advancing theory or solving specific problems as opposed to status reports it is believed that the contents of this volume will be of lasting interest to the Bayesian community The workshop was organized to bring together researchers from different fields to critically examine maximum entropy and Bayesian methods in science and engineering as well as other disciplines Some of the papers were chosen specifically to kindle interest in new areas that may offer new tools or insight to the reader or to stimulate work on pressing problems that appear to be ideally suited to the maximum entropy or Bayesian method These workshops and their proceedings could not have been brought to their final form without the support or help of a number of people
