Elementary Principles of Chemical Processes Richard M. Felder, Ronald W. Rousseau, Lisa G. Bullard, 2015-12-17 This best selling text prepares students to formulate and solve material and energy balances in chemical process systems and lays the foundation for subsequent courses in chemical engineering. The text provides a realistic

informative and positive introduction to the practice of chemical engineering. **Doing Research: A New Researcher's Guide** James Hiebert, Jinfa Cai, Stephen Hwang, Anne K Morris, Charles Hohensee, 2022-12-02 This book is about scientific inquiry. Designed for early and mid career researchers it is a practical manual for conducting and communicating high quality research in mathematics education. Based on the authors extensive experience as researchers as mentors and as members of the editorial team for the Journal for Research in Mathematics Education JRME this book directly speaks to researchers and their communities about each phase of the process for conceptualizing conducting and communicating high quality research in mathematics education. In the late 2010s both JRME and Educational Studies in Mathematics celebrated 50 years of publishing high quality research in mathematics education. Many advances in the field have occurred since the establishment of these journals and these anniversaries marked a milestone in research in mathematics education. Indeed fifty years represents a small step for human history but a giant leap for mathematics education. The educational research community in general and the mathematics education community in particular has strongly advocated for original research placing great emphasis on building knowledge and capacity in the field. Because it is an interdisciplinary field mathematics education has integrated means and methods for scientific inquiry from multiple disciplines. Now that the field is gaining maturity it is a good time to take a step back and systematically consider how mathematics education researchers can engage in significant impactful scientific inquiry.
