Error Analysis in the World. A Bibliography Bernd Spillner, 2017-05-11 Linguistic errors are manifold e.g. in the mother tongue in the acquisition of foreign languages in translations as slip of the tongue or typo. The present compilation of all subject related publications is a comprehensive bibliography for the field of linguistic errors. In a compact introduction Bernd Spillner additionally provides an overview of linguistic didactic and psycholinguistic methods of the analysis and assessment of the errors and their therapy. For the first time publications from numerous countries around the world were included which have not yet been considered. With the attached CD-ROM making the bibliography searchable for keywords in many languages to find relevant publications among the more than 6 000 titles this is a very useful handbook for all linguists and teachers.

Furthermore the frequency of occurrence of different types of errors is also discussed along with some of the possible causes of errors. The findings of the present research highlight that students of government school commit more errors than that of private. Moreover the findings also suggest that students commit errors not only due to their mother tongue influence but because of other reasons which are explained in the analysis section. These findings are valuable for academia to devise policies accordingly.
