Computer Vision and Graphics Leonard Bolc, Ryszard Tadeusiewicz, Leszek J. Chmielewski, Konrad Wojciechowski, 2010-09-14

Annotation This book is part I of a two volume work that contains the refereed proceedings of the International Conference on Computer Vision and Graphics ICCVG 2010 held in Warsaw Poland in September 2010 The 95 revised full papers presented were carefully reviewed and selected from numerous submissions The papers are organized in three topical sections advances in pattern recognition machine vision and image understanding human motion analysis and synthesis and computer vision and graphics

Frontiers of Discontinuous Numerical Methods and Practical Simulations in Engineering and Disaster Prevention Guangqi Chen, Yuzo Ohnishi, Lu Zheng, Takeshi Sasaki, 2013-08-12

Analysis of large deformation rigid body movement and strain or stress for discontinuous materials is often required for project designs and plans in the fields of engineering and disaster prevention Many numerical simulation and analysis methods have been developed for the requirement from science and technology people since 1970s Among them D

Computational Science – ICCS 2002 Peter M.A. Sloot, C.J. Kenneth Tan, Jack J. Dongarra, Alfons G. Hoekstra, 2003-08-01

Computational Science is the scientific discipline that aims at the development and understanding of new computational methods and techniques to model and simulate complex systems The area of application includes natural systems such as biology environmental and geosciences physics and chemistry and synthetic systems such as electronics and financial and economic systems The discipline is a bridge between classical computer science logic complexity architecture algorithms mathematics and the use of computers in the aforementioned areas The relevance for society stems from the numerous challenges that exist in the various science and engineering disciplines which can be tackled by advances made in this field For instance new models and methods to study environmental issues like the quality of air water and soil and weather and climate predictions through simulations as well as the simulation supported development of cars airplanes and medical and transport systems etc

Paraphrasing R Kenway R D Kenway *Contemporary Physics* 1994 There is an important message to scientists politicians and industrialists in the future science the best industrial design and manufacture the greatest medical progress and the most accurate environmental monitoring and forecasting will be done by countries that most rapidly exploit the full potential of computational science Nowadays we have access to high end computer architectures and a large range of computing environments mainly as a consequence of the enormous stimulus from the various international programs on advanced computing e g
