

Aplicaciones Chapter 7

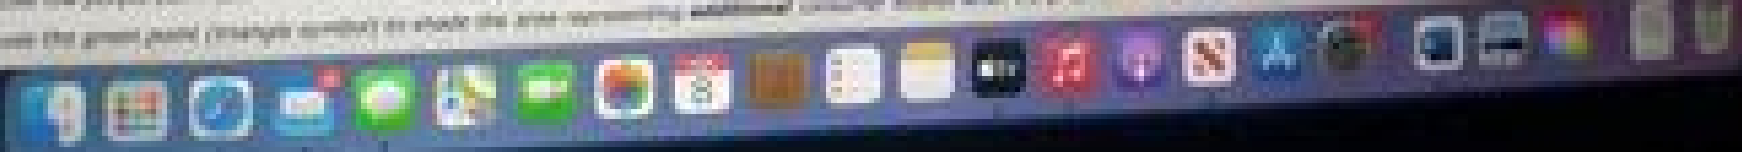

From the previous graph, you can tell that Amy is willing to pay \$3.00 for the 8th bar of chocolate last week. Because the fee is now only \$2.00 per bar, the consumer surplus she gains from the 8th bar of chocolate is \$\_\_\_\_\_.

Suppose the price of chocolate bars is set to \$1.25 per bar. At this lower price, Amy would receive a consumer surplus of \$\_\_\_\_\_ from the 8th bar of chocolate she buys.

The following graph shows the weekly market demand for chocolate in a small economy.

Use the purple area (shaded purple) to shade the area representing consumer surplus when the price (P) of chocolate is \$3.00 per bar. Then, use the green area (shaded green) to shade the area representing additional consumer surplus when the price falls to \$1.25 per bar.
