

The background of the book cover is a stylized, colorful map. It features various shades of blue, green, yellow, and brown, representing different geographical areas, roads, and possibly water bodies. The map is composed of many small, irregular shapes and lines, giving it a complex, abstract appearance.

**Applied Spatial Data Analysis with R** Roger S. Bivand, Edzer J. Pebesma, Virgilio Gómez-Rubio, 2008-08-24 We began writing this book in parallel with developing software for handling and analysing spatial data with R R Development Core Team 2008 though the book is now complete software development will continue in the R community fashion of rich and satisfying interaction with users around the world of rapid releases to resolve problems and of the usual joys and frustrations of getting things done There is little doubt that without pressure from users the development of R would not have reached its present scale and the same applies to analysing spatial data analysis with R It would however not be sufficient to describe the development of the R project mainly in terms of narrowly defined utility In addition to being a community project concerned with the development of world

classdataana sis software implementations it promotes speci c choices with regard to how data analysis is carried out R is open source not only because open source software development including the dynamics of broad and inclusive user and developer communities is arguably an attractive and successful development model
